Subject: Submission Grocery Pricing Inquiry

Sir

I know that this email may be too late for inclusion as part of the inquiry into retail grocery pricing but what would be helpful to see displayed on all canned food is the gross weight of the product plus the net or drained weight of the product. Shoppers would then have an easy comparison of which producer/manufacturer is offering the best value for money.

This I believe is mandatory labelling in the UK and most of Europe.

Thank you

Andrew Mole
