AUSTRALIAN RAIL TRACK CORPORATION LIMITED ABN 75 081 455 754 of ~~Ground Floor, ARTC Building, Off 11~~ Sir Donald Bradman Drive, ~~Passenger Keswick~~ Terminal ~~Road, Mile End~~ South Australia 5034~~5~~ (**"ARTC"**)

IN FAVOUR OF

AUSTRALIAN COMPETITION AND CONSUMER COMMISSION being a body corporate established under section 6A of the ~~TPA CCA~~ (**"ACCC"**)

1 PREAMBLE

1.1 Introduction

- (a) ARTC was established on 24 February 1998 as a company under the Corporations ~~Law~~Act.
- (b) ARTC's shares are fully owned by the Australian Government. ARTC was established as the entity to manage the granting of access to rail operators to the Interstate Rail Network. ARTC was created with an objective to create a single process of access to the Interstate Rail Network consistent with the Competition Principles Agreement and the National Rail Summit Heads of Agreement.
- (c) ARTC currently owns or leases and is responsible for the granting of access to that part of the Interstate Rail Network comprising the Network.
- (d) In ARTC's view, as a vertically separated provider of access, ARTC operates in a competitive environment where competitive pressure from other modes of transport (particularly road) place constraints on rail transport and access pricing. Accordingly, in ARTC's view, it is unlikely to be able to price in any of its markets at levels which will fully recover the full economic costs of its assets.
- (e) As the manager of a significant part of the Interstate Rail Network, ARTC has adopted the concepts of equity and transparency as key elements of its pricing policies. ARTC will not discriminate price on the basis of the identity of the ~~e~~Customer. By so doing, ARTC seeks to stimulate customer confidence, competition and market growth in the rail industry in an evolving environment in which government owned vertically integrated railways have largely been replaced by privately owned operators with access to shared track infrastructure.
- (f) As an access provider, maintenance of the Network and Associated Facilities is a large component of ARTC's current cost structure. These services are either outsourced and managed under maintenance contracts entered into on commercial terms as a result of a competitive

tender process, or, in ARTC's view, otherwise managed on an efficient basis. ARTC has adopted this practice with a view to ensuring that ARTC's cost structure will reflect efficient infrastructure practice.

- (g) ARTC has prepared this Undertaking voluntarily in pursuance of its charter objectives.
- (h) This Undertaking will be applied consistently to Access Applications where such applications are within the scope of this Undertaking as set out in Part 2.

1.2 Objectives

This Undertaking is a voluntary undertaking submitted by ARTC under Part IIIA of the [TPACCA](#). The intent of the Undertaking is to:

- (a) provide a framework to manage negotiations with Applicants for Access to the Network for the purpose of operating Services;
- (b) establish a workable, open, non-discriminatory, efficient and inclusive process for lodging and processing Access Applications;
- (c) use transparent and detailed [methodologies](#), principles and processes for determining access [revenue limits](#), terms and conditions;
- (d) reach an appropriate balance between:
 - (i) the legitimate business interest of ARTC:
 - (A) the recovery of all reasonable costs associated with the granting of Access to the Network;
 - (B) a fair and reasonable return on ARTC's investment in the Network and Associated Facilities commensurate with its commercial risk; and
 - (C) stimulate customer confidence, competition, and market growth in the rail industry;
 - (ii) the interest of the public:
 - (A) increase competition ensuring efficient use of resources;
 - (B) the promotion of economically efficient investment, use and operation of [the Network](#); and
 - (C) promoting other relevant social objectives, such as an increase of traffic from road to rail;
 - (iii) the interests of Applicants wanting Access to the Network, including:

- (A) providing Access to the Network on fair and reasonable terms; and
- (B) providing Access in a-an open, efficient and non-discriminatory manner;
- (e) provide an efficient, effective and binding resolution process in the event that ARTC and the Applicant are unable to negotiate a mutually acceptable Access Agreement; and
- (f) operate consistently with the objectives and principles in Part IIIA of the TPA-CCA and the Competition Principles Agreement.

1.3 Request for information

- (a) The ACCC may, by written notice to ARTC, require ARTC to provide information or documents required by the ACCC in relation to this Undertaking.
- (b) The written notice must set out:
 - (i) in reasonable detail:
 - (A) the information or documents required by the ACCC; and
 - (B) the reasons why the ACCC requires the information or documents.
 - (ii) the form in which the information or documents must be provided; and
 - (iii) the deadline for ARTC to provide the information or documents, which must be no less than 14 days from the date of ARTC's receipt of the notice.
- (c) If ARTC receives a request for information or documents which it considers is unreasonable, then ARTC must advise the ACCC by notice in writing no less than 7 days from the date of ARTC's receipt of the request for information or documents of:
 - (i) the reasons why ARTC considers the request is unreasonable; and
 - (ii) how the request may be modified to address ARTC's legitimate concerns.
 - (d) The ACCC will notify ARTC as soon as practicable its decision after receiving such a request from ARTC. If applicable, the notice must set out the time for ARTC to provide the information or documents pursuant to the ACCC's decision, which must be not less than 14 days from the date of ARTC's receipt of that notice.

PART 2

2 SCOPE AND ADMINISTRATION OF UNDERTAKING

2.1 Scope

- (a) This Undertaking provides for the negotiations of Access required for the operation of Train Services by Operators on the Network, with details of the specified services and sections of the Network defined during Access negotiations. Access will include, in addition to the track, the benefit of Associated Facilities required to facilitate such Access.
- (b) This Undertaking does not extend to any Extension to the Network nor to the track and infrastructure not part of the Network that may connect to the Network.

2.2 Grant and Duration of Undertaking

- (a) ARTC undertakes to the ACCC that it will comply with the terms and conditions specified in this Undertaking in relation to the grant of Access to Operators to the Network for Services. This Undertaking takes effect ~~twenty one (21)~~ 21 days after it is accepted by the ACCC under section 44ZZA(3) of the TPA-CCA ("Commencement Date") and will continue until the earlier to occur of:
 - (i) the expiry of the Term; or
 - (ii) withdrawal of this Undertaking in accordance with its terms or the TPACCA.
- (b) Not later than ~~six (6)~~ 6 months prior to the expiry of the Term of the Undertaking ARTC will submit to the ACCC a written statement outlining whether or not it intends to submit a new voluntary undertaking to the ACCC for its consideration.
- (c) If ARTC intends to submit a new voluntary undertaking to the ACCC for its consideration; ARTC will also apply to the ACCC for an extension of the expiring Undertaking.
- (d) The application for extension would include a proposed extension period which, in ARTC's view, reasonably estimates the time it would take for ARTC to formulate a new undertaking and have that undertaking take effect following approval by the ACCC.
- (e) If ARTC does not propose to submit to the ACCC a new voluntary undertaking then clause (b) to (d) would not be applicable. Nothing in this clause would prevent ARTC from submitting a voluntary undertaking to the ACCC at any time during the Term of this Undertaking.

2.3 Term

This Undertaking will continue to be binding upon ARTC until:

- (a) 30 June 2023~~39~~; or
- (b) the date upon which the ACCC consents to the withdrawal of the Undertaking by ARTC, whichever is the earlier.

2.4 Review of Undertaking

- (a) If, during the Term, ARTC is of the opinion that circumstances have changed such that this Undertaking is no longer commercially viable for ARTC or becomes inconsistent with the objectives prescribed at clause 1.2, ARTC may seek the approval of the ACCC to vary this Undertaking.
- ~~(b) — By 31 December 2011, ARTC will develop and submit to the ACCC, Capital Expenditure in the form of an extended Schedule H, applicable to the period 1 July 2012 to 30 June 2018.~~
- ~~(b)~~ ~~(c)~~ Prior to seeking the approval of the ACCC under clause 2.4(a), ARTC will first consult with Operators regarding the proposed variation.
- ~~(c)~~ ~~(d)~~ ARTC may only vary the Undertaking with the consent of the ACCC under section 44ZZA(7) of the [TPACCA](#).
- ~~(e) — As soon as practicable after the fifth (5th) anniversary of the Commencement Date, ARTC will undertake a review of the Undertaking, in consultation with Operators, potential Operators and other stakeholders. The review will consider any material impact that changes to industry circumstances or Government legislation, rules or regulations may have on the extent to which the Undertaking reasonably meets its intent as prescribed at clause 1.2.~~

2.5 Existing Contractual Agreements

This Undertaking applies only to the negotiations of new Access Agreements or the negotiation of Access Rights in addition to those already the subject of an Access Agreement. Nothing in this Undertaking can require a party to an existing Access Agreement to vary a term or provision of that agreement.

2.6 Insurance

ARTC will take out and maintain a liability insurance policy with a limit of not less than \$250,000,000 for any one occurrence which provides an indemnity in respect of:

- (a) loss of, loss of use of, and destruction or damage to, real or personal property;

3.4 Parties to Negotiation

- (a) ARTC reserves the right to negotiate only with Applicants who comply with the requirements and processes set out in this Undertaking. If an Applicant does not comply with the relevant obligations and processes, and ARTC considers that such non-compliance is material, ARTC will not be obliged to continue negotiations regarding the provision of Access for that Applicant.
- (b) ARTC will negotiate Access with an Applicant which is not an Accredited Operator where the Applicant will procure the services of an Accredited Operator to operate the proposed Services provided that all of the terms and conditions of the Access Agreement are met by the Applicant or the Operator.

In these circumstances, ARTC will advise of such in its acknowledgment and within a further ~~five (5) 5~~ Business Days will advise the Applicant of its estimate of the time required to deliver the Indicative Access Proposal.  - (v) an initial estimate of the Charges for the Access Rights, based on the pricing principles set out in Part 4;
 - (vi) details of the additional information required for ARTC to progress the proposal and further develop the Charges and terms and conditions for acceptance; and
 - (vii) the indicative Train Path availability.
- (d) The Indicative Access Proposal will, unless it contains specific provisions to the contrary, contain indicative arrangements only and does not oblige ARTC to provide Access in accordance with specific terms and conditions, including Charges, contained within it.
- (e) If, after ~~thirty (30)~~ [30](#) Business Days following ARTC's acknowledgment of the Access Application, or if applicable, after expiration of the time estimated by ARTC or [as otherwise agreed or](#) determined by ~~the an~~ [an](#) arbitrator in accordance with [the dispute resolution process in clause 3.8\(b\)3.12 \(as referred to in clause 3.8\(b\)\)](#), the Applicant believes that ARTC is not making reasonable progress in the preparation of the proposal, then the Applicant may refer the matter to ~~the arbitrator for a determination in relation to the progress of the Indicative Access Proposal in accordance with clause 3.12.4(b)~~ [dispute resolution under clause 3.12](#).
- (f) In the event that ARTC is unable to provide an Indicative Access Proposal based on the Access Application, ARTC will, if possible, submit to the Applicant an Indicative Access Proposal offering alternative Access which it reasonably believes may meet the Applicant's Access requirements.

3.9 Negotiation

- (a) If the Applicant intends to progress its Access Application under the negotiation process set out in this Undertaking on the basis of the arrangements outlined in the Indicative Access Proposal, the Applicant will notify ARTC of its intention to do so within ~~thirty (30)~~ [30](#) Business Days of the date it receives the Indicative Access Proposal (or such other period of time that the parties agree). In the event that a notification is given after this period of time, ARTC will review the Indicative Access Proposal and, if considered necessary by ARTC, prepare a revised Indicative Access Proposal in accordance with clause 3.8 and the negotiation process outlined in this Part 3 will recommence from that point.
- (b) If the Applicant is of the view that the Indicative Access Proposal has not been prepared in accordance with this Undertaking and would therefore

not be an appropriate basis for continuing with the negotiation process under this Undertaking, then the Applicant will notify ARTC of its concerns within ~~thirty (30)~~ 30 Business Days of the date of receipt of the Indicative Access Proposal.

- (c) ARTC will take all reasonable steps to respond to the concerns raised by the Applicant in relation to the Indicative Access Proposal under clause 3.9(b) within ~~thirty (30)~~ 30 Business Days of receipt of notification of the concerns. If ARTC is unable to address the concerns of the Applicant within such time frame, ARTC will notify the Applicant in writing as to the reasons why and advise an intended course of action, with indicative time frames, of how the concern is being addressed. If the Applicant is satisfied with the response received from ARTC, including any revision to the Indicative Access Proposal, it will notify ARTC of its intention to proceed with negotiations within ~~thirty (30)~~ 30 Business Days of receiving ARTC's response.
- (d) If the Applicant is not satisfied with the response from ARTC, including any revision to the Indicative Access Proposal, the Applicant may seek to resolve the ~~e~~Dispute in accordance with the dispute resolution process outlined in clause 3.12. ~~The, in which case the Applicant will commence this dispute resolution process within thirty (30) must issue a Dispute Notice within 30~~ Business Days of receiving ARTC's response.

- (b) The negotiation period will commence upon the Applicant providing a notification pursuant to clause 3.9 and will cease upon any of the following events:
 - (i) execution of an Access Agreement in respect of Access sought by the Applicant;
 - (ii) written notification by the Applicant that it no longer wishes to proceed with its Access Application;
 - (iii) the expiration of ~~three (3)~~ 3 months from the commencement of the negotiation period, or if both parties agree to extend the negotiation period, the expiration of the agreed extended period;
 - (iv) if ARTC believes that the negotiations are not progressing in good faith towards the development of an Access Agreement within a reasonable time period;
 - (v) ~~sub-clause (iv) applies and ARTC refers the matter to the arbitrator under clause 3.12.4(b) for a determination on this issue and such determination is found in ARTC's favour; or~~

- (v) ~~(vi)~~ if ARTC receives evidence confirming that the Applicant no longer satisfies the prudential requirements of clause 3.4(d), on receiving such evidence ARTC will advise the Applicant of such evidence and issue a notice of intent to end the negotiation period, to become effective ~~ten (10)~~ 10 Business Days after the issue of the notice. Where ARTC issues a notice of intent, ARTC will provide to the Applicant written reasons for its decision to end the negotiation period.
- (c) Upon cessation of the negotiation period, ARTC will be entitled to cease negotiations with the Applicant.
- (d) In circumstances where two or more Applicants are seeking mutually exclusive Access Rights:
 - (i) each Applicant will be so notified as soon as practicable after the relevant conflict arises;
 - (ii) Access will be granted to the Applicant who accepts an Access Agreement with ARTC which, in the opinion of ARTC, is most favourable to it. Ordinarily, but without limiting ARTC's discretion in this regard, ARTC would make such a decision based on the Access Agreement that represented the highest present value of future returns to ARTC after considering all risks associated with the Access Agreement.
- (e) If, at any time during the negotiation period, a dispute arises between the parties ~~which, after reasonable negotiation, the parties are unable to resolve to their mutual satisfaction, then either party may seek to resolve the dispute that~~ Dispute will be resolved in accordance with the dispute resolution process outlined in clause 3.12.

The details of Schedule C do not provide an exhaustive list of the issues that may be included in an Access Agreement.
- (c) ARTC must offer the Indicative Track Access Agreement to an Applicant if the Applicant:
 - (i) seeks access to Indicative-Reference Services; and
 - (ii) meets the prudential requirements in clause 3.4(d); and
 - (iii) either:
 - (A) ~~if~~ the Network has sufficient Available Capacity to meet the Applicant's needs; or
 - (B) ~~if~~ ARTC consents to provide Additional Capacity to meet the Applicant's needs in accordance with clause 6.23.
- (d) Once the Applicant has notified ARTC that it is satisfied with the terms and conditions of the Access Agreement as drafted, ARTC will, as soon as reasonably practicable, provide a final Access Agreement (or, if applicable, an amendment to an existing Access Agreement) to the Applicant for execution.
- (e) Where the ARTC offers an Access Agreement and the Applicant accepts the terms and conditions offered in that Access Agreement, both ARTC and the Applicant will execute the Access Agreement. The parties will use reasonable endeavours to comply with this clause as soon as practicable.

3.12 Dispute Resolution

- (K) must not require ARTC to bear some or all of the costs of interconnections to the Network or maintaining interconnections to the Network.

(xiv) If an Applicant does not enter into an Access Agreement consistent with an award of the Arbitrator within 20 Business Days of the award or such later time provided in the award, the Applicant or any associate of the Applicant must not give a Dispute Notice about the same or substantially similar Service the subject of the award for a period of one year from the date of the award.

(xv) ~~(xv) Except where the determination or direction is subject to a review by~~ Except where the award is subject to an appeal or application to set aside in a court of law, if an Applicant does not comply with ~~a determination or direction of the arbitrator~~ the award, then ARTC will no longer be obliged to continue negotiations regarding the provision of Access for that Applicant.

(b) ARTC will notify the ACCC of Disputes referred to arbitration at the time of referral and will provide the ACCC, on a confidential basis, with a copy of any award made by an Arbitrator pursuant to this clause 3.12.5.

PART 4

4 PRICING PRINCIPLES

4.1 Objectives

ARTC will develop its Charges with a view to achieving the objective set out in clause 1.2(d).

4.2 Charge Differentiation

In formulating its Charges, ARTC will have regard to a range of factors which impact on its business including, but not limited to, the following:

- (a) in particular, the [Indicative Access Charges for Indicative Standing Offer for Reference Services](#) ~~set out in clause 4.6~~;
- (b) the particular characteristics of the relevant Service, which without limitation include axle load, speed, wheel diameter, Train length, origin and destination (including number and length of intermediate stops), departure and arrival times and days of the week;
- (c) the commercial impact on ARTC's business, which without limitation includes factors such as:
 - (i) the term of the Access Agreement;
 - (ii) the potential for growth of the business;
 - (iii) the opportunity costs to ARTC;
 - (iv) the consumption of ARTC's resources, including [relative Capacity consumption](#);
 - (v) the credit risk associated with the business;
 - (vi) the market value of the Train Path sought;
 - (vii) the Segments of the Network relevant to the Access being sought; [and](#)
 - (viii) previously negotiated Charges agreed under the terms of this Undertaking, where relevant, as published by ARTC as set out in clause 2.7(b); [and](#)
 - (ix) [changes requested by the Applicant to the Indicative Track Access Agreement](#).
- (d) logistical impacts on ARTC's business which without limitation include:
 - (i) the impact on other Services and risk of failure of the Operator to perform; and

- (ii) reduced Capacity and system flexibility;
- (e) capital or other contributions by the Applicant to ARTC's costs; and
- (f) the cost of any Additional Capacity.

~~For the purpose of Clause 4.2 4.2(c)(iv), ARTC will have regard to the predominant usage of the Network being for Indicative Services to which Indicative Access Charges apply. ARTC will also recognise that investment in the development of the Network is primarily to improve utilisation and performance of Indicative Services. As such, Capacity consumption in relation to Trains operating with characteristics other than that of Indicative Services will be determined having regard to the Capacity consumption of Indicative Services on a Network utilised by Indicative Services.~~

4.3 Limits on Charge Differentiations

- (a) Subject to ~~C~~clause 4.2 above, in formulating its Charges, and subject to ARTC having an obligation under ~~C~~clause 2.3 of the Indicative Track Access Agreement, ARTC will not have regard to:
 - (i) the identity of the Applicant; and
 - (ii) whether or not the Applicant is a Government Authority.
- (b) Subject to ~~C~~clause 4.2 above, in formulating its Charges, ARTC will not differentiate between Applicants in circumstances where:
 - (i) the characteristics of the Services are alike; and
 - (ii) the Applicants are operating within the same end market.

For the purposes of this clause, ARTC will determine whether the characteristics of two Services are alike having regard to matters including but without limitation the applicable non-price terms, location, duration and quality of the Train Path, nature of Train consist, characteristics of the Service, longevity of Access, arrival and departure times of the day and week.

4.4 ~~Revenue Limits~~

- ~~(a) Notwithstanding any other clause within this Part 4, the Charges formulated by ARTC for the Services will be such that the revenue generated by ARTC for a Segment or group of Segments (applicable to the Service as the case may be) will:~~
 - ~~(i) not be lower than the Floor Limit for that Segment or group of Segments (unless otherwise agreed by ARTC); and~~
 - ~~(ii) not be higher than the Ceiling Limit for that Segment or group of Segments.~~
- ~~(b) The Floor Limit means revenue for ARTC sufficient to cover the incremental cost of that Segment or group of Segments. For the purpose of this clause,~~

~~incremental costs means the costs that could have been avoided if a Segment was removed from the Network including Segment Specific Costs and Non-Segment Specific Costs relating to the following activities:~~

- ~~(i) — track and signalling and communication maintenance;~~
- ~~(ii) — maintenance contract support, administration and management and project management;~~
- ~~(iii) — train control and communication;~~
- ~~(iv) — train planning and operations administration; and~~
- ~~(v) — (system management and administration;~~

~~but excluding Depreciation and return on assets relating to Segment Specific Assets and Non-Segment Specific Assets, such return being determined by applying a real Rate of Return to the value of these assets.~~

- ~~(c) — Where applicable, the Ceiling Limit means revenue sufficient to cover the Economic Cost of that Segment or group of Segments.~~
- ~~(d) — In calculating the Economic Cost for the purposes of the Ceiling Limit, the Network and Associated Facilities will be:~~
 - ~~(i) — valued initially using the depreciated-optimised replacement cost method of valuing assets (“Initial Regulatory Asset Base (Initial RAB)”);~~
 - ~~(ii) — revalued annually by roll forward according to the following methodology:~~

$$\text{RAB}_{t \text{ start}} = \text{RAB}_{t-1 \text{ end}} =$$

$$(1 + \text{CPI}_{t-1}) * \text{RAB}_{t-1 \text{ start}} + \text{Net Capex}_{t-1} - \text{Depreciation}_{t-1}$$

~~where~~

~~RAB_{t start} is the RAB at the start of the relevant year (t) (which, for the first year following the Commencement Date, would be the Initial RAB).~~

~~RAB_{t-1 end} is the RAB at the end of the preceding year (t-1) as applicable. RAB_{t-1 start} is the RAB at the start of the preceding year (t-1) as applicable.~~

~~CPI_{t-1} is the inflation rate for the preceding year (t-1), determined by reference to the All Groups Consumer Price Index Statistics published for the March quarter of that year.~~

~~Net Capex_{t-1} is the net additions to the RAB in year t-1 (that is out-turn Capital Expenditure by ARTC less any disposals during period t-1) on a Prudent basis.~~

~~Depreciation_{t-1} is the Depreciation applicable to the RAB in year t-1.~~

~~For the purpose of this clause, the optimised replacement cost means the cost of replacement by commercially efficient application of best known currently available technology based on existing capacity and performance characteristics of the asset.~~

- ~~(e) For the purpose of this Part 4, any increase to Capital Expenditure would be limited to that which may result from:~~
- ~~(i) the addition of a capital or renewals project by ARTC needed to meet market demand for capacity and performance of the Network, or needed to extend the economic life of the Network;~~
 - ~~(ii) an increase in the scope of works identified in the applicable ARTC Corridor Strategy current as at the Commencement Date or as varied from time to time; the addition of a capital or renewals project by ARTC resulting from what is considered to represent an efficient means to achieve that demand or extend that economic life;~~
 - ~~(iii) a change in what is consistent with existing standard and configuration of adjacent and/or existing infrastructure with similar utilisation and market requirements, or its modern engineering equivalent;~~
 - ~~(iv) whether expenditure is incurred efficiently in implementing the capital or renewals project, in the context of prevailing access and operating requirements, and input costs;~~
 - ~~(v) adjustments in relation to the timing of commencement and/or commissioning of projects; or~~
 - ~~(vi) the removal or addition of a capital or renewals project by ARTC that is supported by the industry.~~

~~For the purpose of this clause, ARTC will obtain the approval of the ACCC, having regard to the factors in this clause, for any increase to Capital Expenditure exceeding 20% of Capital Expenditure on the Network in any single year.~~

- ~~(f) For the purposes of this Part 4, Economic Cost of a Segment means:~~
- ~~(i) Segment Specific Costs;~~
 - ~~(ii) Depreciation of Segment Specific Assets;~~
 - ~~(iii) a return on Segment Specific Assets, being determined by applying a real Rate of Return to the value of Segment Specific Assets;~~
 - ~~(iv) an allocation of Non-Segment Specific Costs;~~
 - ~~(v) an allocation of Depreciation of Non-Segment Specific Assets;~~
 - ~~(vi) an allocation of return of Non-Segment Specific Assets, being determined by applying a real Rate of Return to the value of Non-Segment Specific Assets; and~~

- ~~(vii) — the costs described in clause 4.4(f)(i) to (vi) as applicable to Additional Capacity.~~
- ~~(g) — For the purposes of clause 4.4(f), Non-Segment Specific Costs and Depreciation of, and return on, Non-Segment Specific Assets will be allocated to Segments in accordance with the following principles:
 - ~~(i) — where possible, costs will be directly attributed to a Segment;~~
 - ~~(ii) — where possible, Non-Segment Specific Costs and Non-Segment Specific Assets will be identified with a corridor, corridors or identified as system-wide;~~
 - ~~(iii) — Non-Segment Specific Costs and Depreciation of, and return on, Non-Segment Specific Assets identified with a corridor or corridors, or identified as system-wide, will be allocated to those parts of Segments in that corridor or corridors, or, where identified as system-wide, to Segments owned, leased or licensed by ARTC respectively, in proportion to:
 - ~~(A) — gtkm with respect to Non-Segment Specific Costs and Depreciation of, and return on, Non-Segment Specific Assets associated with track maintenance; and~~
 - ~~(B) — Train kilometres with respect to Non-Segment Specific Costs and Depreciation of, and return on, Non-Segment Specific Assets not associated with track maintenance.~~~~~~

~~All costs will comprise ARTC's reasonably anticipated costs over a reasonable future timeframe.~~

- ~~(h) — The Rate of Return for the purposes of this Part will be equivalent to ARTC's weighted average cost of capital ("WACC") as accepted by the ACCC after consideration of all risks with the commercial environment in which ARTC operates on the Network, the elements of which will comprise:
 - ~~(i) — a capital asset pricing model ("CAPM") method of determining the cost of equity;~~
 - ~~(ii) — a debt to equity ratio which would be considered prudent for ARTC's business in relation to the Network by reputable lenders; and~~
 - ~~(iii) — an appropriate adjustment (beta) factor to the equity risk margin appropriate for investment in railway infrastructure forming part of the Network.~~~~

4.4 4.5 Structure of Charges

- (a) Access charges will comprise:
 - (i) a variable component, which is a function of distance and gross mass (\$/gtkm); and

- (ii) a flagfall component, which is fixed and specific to each Train service type and Segment (\$/km), ~~and may comprise:~~
- (iii) ~~an excess network occupancy component, which is a function of time (\$/hr or part thereof) sought by an Applicant for a Train Path on the Network, which is in excess of:~~
 - (A) ~~a reasonable allowance for section run times for the applicable Train service type as determined by ARTC;~~
 - (B) ~~dwells for crossing and passing other Trains as determined and made available by ARTC for the Train Path; and~~
 - (C) ~~an allowance for the reasonable requirements for operational activities whilst the Train occupies the Network as specified at clause 4.6(c).~~
- (b) ~~Subject to clause 4.5(c), the application of the excess network occupancy component relates only to the contracted Train path, and not the utilisation of the Train Path.~~
- (c) ~~In determining the excess network occupancy component (if applicable), ARTC will pro-rata the flagfall component back to an amount per hour by reference to the total of section run times applicable to the relevant Segment to which the flagfall component applies.~~
- (b) ~~(d)~~ Except as otherwise provided in the Access Agreement, the flagfall component ~~and excess network occupancy component~~ of the Charges, ~~as applicable, are is~~ levied from the date ARTC grants access to the Train Path to the Operator until the expiry of that Train Path irrespective of whether such Train Path is utilised.
- (e) ~~The excess network occupancy component will only apply where the Applicant seeks to contract a Train Path on the Network, which is in excess of:~~
 - (i) ~~a reasonable allowance for section run times for the applicable Train service type as determined by ARTC;~~
 - (ii) ~~dwells for crossing and passing other Trains as determined and made available by ARTC for the Train Path; and~~
 - (iii) ~~an allowance for the reasonable requirements for operational activities whilst the Train occupies the Network as specified at clause 4.6(c).~~
- (f) ~~In relation to utilisation of a contracted Train Path, the excess network occupancy component will not be charged in instances where ARTC is not able to provide the contracted Train Path or an agreed substitute Train Path except where the failure to provide the contracted Train Path is a result of an Incident, Third Party Works or an emergency.~~

- (c) ~~(g)~~ Notwithstanding the structure described above, all elements of the Charge are open to negotiation. Any variation to the structure described above will be agreed between ARTC and the Applicant.

(b) (d) ARTC may annually vary the Indicative Access Charges for Indicative on 1 July the Standing Offer for Reference Services (“Review Date”) by up to an amount determined in accordance with the following formula:

$$AC_t = AC_{t-1} * (1 + TV_i)$$

AC_{i-1} is the Indicative Access Charges for Indicative Standing Offer for Reference Services immediately preceding the relevant Review Date;

TV_i is the maximum variation to Indicative Access Charges the Standing Offer for Reference Services (measured as a percentage) that may be applied from 1 July 2008~~23~~ and thereafter from each 1 July during the Term (“**Determination Date**”) and is to be determined in accordance with the following formula;

~~TV_i is the greater of~~

~~$$TV_i \text{ is } (((CPI \text{ Index}_i / CPI \text{ Index}_0) / CV_{i-1}) - 1) * 100$$~~

~~(B) — Zero~~

Where

$CPI \text{ Index}_i$ is the All groups Consumer Price Index, Weighted Average of Eight Capital Cities, Index Number for the March quarter preceding the relevant Determination Date;

Where

$V_1, V_2 \dots V_{i-1}$ are the actual % variations which have been applied to the Indicative Access Charges for Indicative Standing Offer for Reference Services from 1 July 2008~~23~~ to the relevant Determination Date.

~~For the purpose of determining TV_i for the sixth Determination Date, $CPI \text{ Index}_0$ will be reset to $CPI \text{ Index}_5$ and CV_5 will be reset to 1.~~

(c) ARTC will publish:

(i) ~~(a)~~(a) $(CV_{i-1}) \times 100$; and

(ii) ~~(b)~~(b) $((CPI \text{ Index}_i / CPI \text{ Index}_0) / CV_i) - 1) * 100$

following each Review Date.

4.6 **Publication of Charges**

- (a) ARTC will publish on its website:

 - (i) the Standing Offer for Reference Services; and
 - (ii) subject to paragraph (b), prices for which Access has been granted to a Customer for Services other than Reference Services, together with a general description of the Services to which such prices relate.

- (b) If ARTC cannot de-identify a Customer from the pricing information it is required to publish under paragraph (a)(ii), then ARTC will publish the pricing information or equivalent information that it can reasonably do so in the circumstances.

PART 5

5 MANAGEMENT OF CAPACITY

5.1 Capacity Analysis

- (a) A Capacity Analysis will be undertaken by ARTC as part of the preparation of the Indicative Access Proposal. The Capacity Analysis will identify whether, indicatively, there is sufficient Available Capacity to meet the Applicant's requirements and, if not, indicatively, the extent to which Additional Capacity is required.
- (b) Where ARTC believes that there are major impediments to the provision of Additional Capacity to meet the requirements of the Applicant, and that the Capacity enhancement that might be necessary would have a significant bearing on the economics of the proposed operation, the Capacity Analysis may be done in more detail which may require more time for the preparation of the Indicative Access Proposal (see clause 3.8(b)). Where a Capacity Analysis is to be done in more detail pursuant to this clause, ARTC may charge a fee that is based on reasonable cost and agreed with the Applicant.
- (c) The finalisation of the Capacity Analysis will enable the finalisation of the resultant Capacity Entitlement, Train Paths, Charges and terms and conditions of the resultant Access Agreement.

5.2 Capacity Allocation

- (a) In the event of multiple Applicants and subject to clause 5.2(b), Access Rights will be allocated to the Applicant with whom ARTC can negotiate and execute an Access Agreement which, in the opinion of ARTC, is most favourable to it.
- (b) As previously stated in this Undertaking, if, at any time, two or more Applicants are seeking access with respect to mutually exclusive Access Rights, each of the Applicants who have received an Indicative Access Proposal with respect to those mutually exclusive Access Rights will be so advised. In such circumstances, ARTC is entitled to seek to finalise an Access Agreement in respect of such Access with the Applicant with whom ARTC can agree terms and conditions, including Charges, which are considered in the opinion of ARTC, to be most favourable to it. Ordinarily, but without limiting ARTC's discretion in this regard, ARTC would make such a decision based on the Access Agreement that represented the highest present value of future returns to ARTC after considering all risks associated with the Access Agreement.

5.3 Capacity Transfer

- (a) The terms of the Access Agreement will provide that ARTC may reduce Train Paths by removing particular Train Paths where a Customer has under-utilised its Capacity Entitlement granted to it under that Access

Agreement. Any decision by ARTC in this regard is subject to the dispute resolution provision in the Access Agreement.

- (b) A Customer may also reduce its Capacity Entitlement by cancelling Train Paths in accordance with the terms of the Access Agreement.
- (c) Train Paths may be assigned by a Customer to a third party with approval from ARTC in accordance with the assignment provisions of that Access Agreement.

Part 6

PART 6

6 NETWORK CONNECTIONS AND ADDITIONS

6.1 Interstate Network Development Strategy

- (a) ARTC will develop an Interstate Network Development Strategy annually.
- (b) In developing the Interstate Network Development Strategy, ARTC will base the strategy on the rolling annual capacity forecast developed by ARTC, which will:

 - (i) be based on forecast volumes sought by existing and prospective Customers;
 - (ii) forward growth capital; and
 - (iii) identify future Capacity and performance requirements.
- (c) The Interstate Network Development Strategy will include Capacity expansion options which:

 - (i) seek to ensure sufficient Capacity to meet Operators combined demand forecasts;
 - (ii) include a preliminary high-level assessment of objectives, indicative benefits and estimated costs;
 - (iii) include an estimate of cost to be incurred in the concept assessment stage; and
 - (iv) include recommendations on the preferred options.
- (d) The Interstate Network Development Strategy is indicative only and any Capacity expansion options set out in the Interstate Network Development Strategy are subject to ARTC's approval processes.
- (e) Before finalising the Interstate Network Development Strategy, ARTC will:

 - (i) schedule an annual meeting with the Operators;
 - (ii) publish a draft Interstate Network Development Strategy on the ARTC website and invite comments on the options set out in draft strategy from all users of the Network; and
 - (iii) consider the views submitted by those stakeholders in good faith and take those views into account in finalising the Interstate Network Development Strategy.
- (f) ARTC will publish the Interstate Network Development Strategy on its website as soon as practicable after it is finalised each year under section 6.1(e)(iii).

- (g) On completion of a preferred Capacity expansion option, ARTC will prepare and publish on its website a “close-out report” detailing:
 - (i) a summary of project deliverables;
 - (ii) a summary of capital expenditure incurred for the project; and
 - (iii) a review of the project against its initial budget, timeline and scope.

6.2 6.1 Network Connections

- (a) In the event that other owners of track not part of the Network wish to connect such track to the Network, ARTC will consent to such a connection provided:
 - (i) all relevant approvals from all relevant Government Authority have been obtained;
 - (ii) the configuration of the connection to the Network is such that the connection will not, by virtue of its existence, reduce Capacity;
 - (iii) procedural and physical interface arrangements are in compliance with ARTC’s existing interface arrangements and there is no impact on the safety of all users of the Network;
 - (iv) the owners of track not part of the Network ensure that all users of such track comply with the directions of ARTC’s Train controllers regarding entry to and exit from the Network;
 - (v) the connection meets ARTC’s engineering and operational standards; and
 - (vi) the owners of track not part of the Network meet the initial and continued costs associated with constructing and maintaining the connection.
- (b) If ARTC has refused consent under clause 6.42(a)(ii), ARTC will, if requested to do so by the Applicant, notify the Applicant in writing of the reasons why the connection would, in its view, reduce Capacity.

6.3 6.2 Additional Capacity sought by Applicants

- (a) As indicated in clauses 3.8 and 5.1, ARTC will consider as part of the negotiation process, any requests by Applicants for Additional Capacity. ARTC will consent to the provision of Additional Capacity if:
 - (i) in ARTC’s opinion, such provision is commercially viable to ARTC having regard to the relevant Access Agreement-, the Interstate Network Development Strategy and ARTC’s total business activity;or

- (ii) the Applicant agrees to meet the cost of the Additional Capacity; and
- (iii) the Additional Capacity of the Network is, in the opinion of ARTC, technically and economically feasible, consistent with the safe and reliable operation of the Network, will not impact on the safety of any user of the Network, does not reduce Capacity, meets ARTC's engineering and operational standards and does not compromise ARTC's legitimate business interests.

(b) If ARTC does not agree to the creation of Additional Capacity, then ARTC will provide the relevant Applicant with its reasons in writing (having regard to the matters in paragraph (a)).

(c) A request by Applicants for Additional Capacity under paragraph (a) may, but does not need to be, Additional Capacity identified in the Interstate Network Development Strategy.

(d) ~~(b)~~ In the event ARTC agrees to the creation of Additional Capacity, ARTC's costs of providing that Additional Capacity may be met;

- (i) by the Applicant reimbursing the relevant costs as and when they are incurred by ARTC; or
- (ii) through increased Charges, or making other periodic payments, reimbursing ARTC for recurring costs, plus an annuity in advance calculated ~~by application of WACC to~~ in respect of ARTC's capital outlay; or
- (iii) by such other way that ARTC and the Applicant agree.

(e) ~~(c)~~ The option of increasing Charges or making periodic payments including an annuity as set out in clause 6.23~~(bd)~~(ii) is only available to an Applicant if arrangements are made which satisfy ARTC that the risk of the Applicant failing to make such payments is commercially acceptable and is at ARTC's discretion.

(f) ~~(d)~~ Any Additional Capacity, once created, will be owned and managed by ARTC.

(g) ~~(e)~~ Where requested to do so by an Applicant, ARTC will provide the Applicant written reasons for the basis of decisions made by it in relation to Additional Capacity.

6.4 **6.3 Additional Capacity sought by ARTC for the benefit of the rail industry**

- (a) ARTC may make an application to the ACCC to provide Additional Capacity, including a variation to Indicative Access Charges the Standing Offer for Reference Services to reflect the cost of that Additional Capacity, at any time during the Term.

~~(c) — Where approved by the ACCC, expenditure incurred efficiently in providing the Additional Capacity, in the context of prevailing access and operating requirements and input costs, will be included in Capital Expenditure.~~

~~(c)~~ **6.4** The ACCC may also have regard to expenditure incurred efficiently in providing the Additional Capacity, where approving a variation to [Indicative Access Charges—the Standing Offer for Reference Services](#) to reflect the cost of that Additional Capacity.

SCHEDULE F

Schedule F (Network Management Principles)

This schedule applies in circumstances where Train Paths are interrupted due to matters outside ARTC's control and there is a need to resolve competing interests of users of the Network. Refer to the following ~~three (3)~~ 4 pages.

NETWORK MANAGEMENT PRINCIPLES

Train Decision Factors

The following definitions apply in this Schedule F except where expressly limited.

“Commuter Peak Services” means ~~RailCorp’s TAHE’s~~ commuter rail passenger services arriving at Sydney Central ~~Station or Newcastle~~ Station between 0600 and 0900 hours and departing Sydney Central ~~Station or Newcastle~~ Station between 1600 and 1800 hours and continuing until they reach their destination point.

“Express Freight Services” means those freight services capable of maintaining sectional running times that are, or are determined by the appropriate Train Controller, to operate at faster sectional times than local Frequent-Stopping Services.

“Frequent-Stopping Services” means those rail passenger services that stop at most or all stations along their Train Path.

“Healthy Train” means a Train that, having regard to the daily train plan applicable on the day:

- (a) presents to the Network on time, is configured to operate to its schedule and operates in a way that it remains able to maintain its schedule; or
- (b) is running late only due to causes within the Network, but only where the root cause is outside the Operator’s control; or
- (c) is running on time, regardless of previous delays.

“Limited-Stop Services” means those rail passenger services that stop at a few selected stations along their Train Path.

“Long-distance Passenger Services” means those rail passenger services operating to or from points outside the Sydney metropolitan rail area, excluding ~~RailCorp’s TAHE’s~~ CityRail services.

“Non-Revenue Positioning Movements” means movements of Trains required for reasons other than revenue services.

“Special Event” means a major community, cultural, sporting or similar event within the metropolitan rail area, which is identified as such by a relevant NSW agency, and which may require:

- (a) a special timetable for the operation of ~~RailCorp TAHE~~ rail passenger services before, during and after the event; and
- (b) significant operational priority for ~~RailCorp TAHE~~ rail passenger services; and
- (c) consequential adjustments to other rail operators’ services.

“Train” means a single unit of ~~r~~Rolling ~~s~~Stock or 2 or more units of ~~r~~Rolling ~~s~~Stock including a locomotive or other self propelled unit coupled together to operate on the ~~T~~track as a single unit.

“Train Control” means the control and regulation of all rail operations (including Train Movements, movements of Rolling Stock and track maintenance vehicles) to ensure the safe, efficient and proper operation of the Network.

“Train Movement” means a particular trip by a Train on a Train Path.

“Train Path” means the series of network segments over a particular time interval through which a Train can travel and may include stopping points and intervals and fuelling stations and other set down or changeover points.

TRAIN DECISION FACTORS:

1. **Where Trains are on-time**, they will be managed as specified in the daily train plan.
2. **Where one or more Trains are late or unhealthy**, they will be managed as specified in the matrices below subject to a rail operator’s preferences for its own services.

The 2 tables are used in conjunction with each other. Table 1 will enable a person undertaking Train Control (“**Train Controller**”) to define the relative priority of two conflicting Trains. Table 2 will specify the type of decision available to Train Controller in delivering Train Control directions to resolve the potential conflict.

Table 1 — Train Priority Matrix

Decreasing order of priority	Type of train service in ARTC Network
From Highest	Long-distance Passenger Services
	Commuter Peak Services and rail passenger services likely to affect Commuter Peak Services or Special Event services.
	Limited — Stop Services that are not Commuter Peak Services or Special Event Services.
	Freight services likely to affect Commuter Peak Services or Special Event services.
	Express Freight Services
	Frequent-Stopping Services that are not Commuter Peak Services.
	Non-express Freight Services
To Lowest	Non-Revenue Positioning Movements

Table 2 — Decision Matrix

Trains of Equal Health	Both Healthy One on Time & One Late	Both Late
Equal Priority Trains	Rule 1 + 2	Rule 3
Unequal Priority Trains		Rule 6 + 3
Higher Priority Train is On Time + Lower Priority is Late	Rule 5 + 2	
Higher Priority Train is Late + Lower Priority Train is On Time	Rule 4 + 2	
Trains of Unequal Health	Rule 7 + 2	

Rule 1:

- (a) A Healthy Train should be managed such that it will exit on time.
- (b) If a Healthy Train is running late, it should be given equal preference to other Healthy Trains and advanced wherever possible to regain lost time. Any delay to other Healthy Trains as a result of such advancement must be kept to a minimum as defined in Rule 2.

Rule 2: The following delay limits apply to the full journey of a Healthy Train being held back:

- (a) the delay to the individual rail passenger service held back does not exceed 5 minutes;
- (b) there is a plan in place to recover lost time so that the downstream effect on the service held back and on individual subsequent rail passenger services also does not exceed 5 minutes;
- (c) the delay to a freight service held back does not exceed 15 minutes; or
- (d) there is a plan in place to recover lost time so that the downstream effect on the healthy freight service held back and on individual subsequent healthy freight services also does not exceed 15 minutes. Any plan for the recovery of time by freight services must be capable of being achieved prior to their entry into the Sydney metropolitan rail area.

Rule 3: Give preference to the Train whose Train performance indicates it will lose least or no more time and even make up time and hold the gain; and consider downstream effect to minimise overall delay.

Rule 4: A lower priority Train gets preference. A higher priority Train can be given preference subject to the delay to the lower priority Train being kept to a minimum as defined in Rule 2.

Rule 5: A higher priority Train should be given preference over a lower priority Train. A lower priority Train may be given preference over higher priority Train provided the delay to that Train is kept to a minimum as defined in Rule 2.

Rule 6: A high priority Train has preference, subject to Rule 3.

Rule 7: A Healthy Train should be given preference over an unhealthy Train. An unhealthy Train may be given preference over a Healthy Train provided the delay to that Train is kept to a minimum as defined in Rule 2.

SCHEDULE G

Schedule G (Performance Indicators)

Sum of minutes delay (and minutes per hour transit) attributed to below rail cause by type of delay eg track, signals/communications, train management/control.	ARTC	Quarterly
Sum of minutes delay (and minutes per hour transit) attributed to above rail cause by type of delay eg late entry, yard/terminal, crew, locomotive, rollingstock Rolling Stock, running.	Operator	Quarterly

1. Separate reporting will be undertaken in relation to Services segregated by ARTC (and averaged or aggregated as applicable) as East- West, Melbourne — Sydney, Sydney — Brisbane and Melbourne — Brisbane. Reported performance will only relate to that on the Network. All measures would not reflect Services materially affected by a Force Majeure event (as defined in the Indicative [Track Access Agreement](#)).

2. For this purpose, a healthy service is one which:
 - a. presents to the Network within tolerance⁴, is configured to operate to its schedule and operates in a way that it remains able to maintain its schedule; or
 - b. is running late only due to causes within the Network, but only where the root cause is outside the rail operator's control; or
 - c. is running within tolerance⁴, regardless of previous delays.
3. Services include all Committed [Capacity](#) and scheduled Capacity (excludes ~~ad hoc~~ [ad hoc](#) Services).
4. For this purpose tolerance is to be 15 minutes (unless otherwise agreed).
5. It may be appropriate to employ shorter or longer timeframes as appropriate depending on corridor transit times.
6. Separate reporting will be undertaken in relation to ~~an Indicative~~ [a Reference](#) Service (and averaged as applicable) movement on Melbourne - Parkeston, Melbourne - Sefton Park East Junction, Newcastle - Queensland Border-, and Cootamundra - Crystal Brook. Reported performance will only relate to that on the Network.
7. A measure of transit time over the Network, delivered by the infrastructure given its configuration (alignment, grades, curves and associated permanent speed restrictions). Measured by simulated operation of a ~~Reference~~ [Indicative](#) Service over the Network (excluding prevailing temporary speed restrictions). Reported on the basis of average speed.
8. A measure of transit time over the Network, delivered by the infrastructure given its configuration (as measured by Transit Time - Infrastructure Configuration Capability) and maintenance requirements (including the transit time impact of temporary speed restrictions). The transit time impact of temporary speed restrictions is determined by applying the temporary speeds restrictions in place on the Network to a simulation model designed to determine the total of time lost by ~~Reference~~ [Indicative](#) Service subject to each temporary speed restriction. Reported on the basis of average speed.
9. A measure of transit time offered to the market, delivered by the infrastructure given its configuration, maintenance requirements and network usage (scheduled delays for path interactions). Measured by average scheduled transit time for ~~Indicative~~ [Reference](#) Services adjusted for any Operator requirements (dwells, deviation from offered section run times). Reported on the basis of average speed.
10. Transit time is the difference between entry and exit times and so includes all time for all enroute activities (scheduled and actual).
11. Separate reporting will be undertaken in relation to Segments segregated by ARTC (and averaged or aggregated as applicable) as East- West, Melbourne - Sydney, Sydney - Brisbane. Reported performance will only relate to that on the Network.
12. To be measured by Track Quality Index (TQI) and averaged over each Segment. The TQI is calculated over 100m sections, using 0.5m raw data from the AK car. TQI is the sum of the standard deviations (x3) in each rail for a 20m inertial top (average over left and right rail), horizontal alignment (versine over a 10m chord (average over left and right rail)), twist over 2.0m and gauge.

Table 2 - Periodic Reporting of ARTC Unit Costs

Cost Area	Unit Cost	Frequency
Infrastructure Maintenance ¹	\$/track km, \$/GTK	Annually
Train Control ²	\$/train km	Annually
Operations ³	\$/train km	Annually

1. Total annual expenditure associated with outsourced infrastructure maintenance and associated ARTC maintenance contract management function.
2. Total annual expenditure associated with ARTC ~~Train~~ [eControl](#) and transit management function.
3. Total annual expenditure associated with 2 above, and ARTC operations planning and management function.
