Subject: Rising electricity prices.

Dear ACCC,

I really hope that you can bring about some changes. Have to wonder with the many of the electricity owned by other countries how much can be done.

Not only is the price of electricity on the rise but hoping that the ACCC can address the price of a supply charge. My last quarterly electricity bill from [REDACTED] was \$95.00 for the supply charge alone. This does not include actual usage charges. So no matter how I try to save on the the usage by not switching lights and not using the heater as much as I can I am having to pay \$95. Seems like money for jam. Pretty much the same goes for the supply charge for my gas account.

Regards

Liz Barrow.
