

**Extracts of reports prepared under the amended Disclosure Direction provided to nbn co limited on 18 October 2021 in relation to the NBN Services in
Operation Record Keeping and Reporting Rules**

30 September 2022 Reporting Date

The data presented in the extracts relate to 'Network Access Services' supplied by **nbn**, and do not include any services that are supplied over other access networks.

The AVC and CVC data presented in the extracts do not separately identify access services that are used by access seekers to supply retail or wholesale services. Hence the data presented in the extracts are not intended to provide a reliable view of the share of total **nbn** Network Access Services, or of total services, that a provider supplies in the retail market.

Capitalised terms have the same meaning as in the NBN Services in Operation Record Keeping and Reporting Rules (NBN SIO RKR).

Notes:

1. As defined in the Disclosure Direction (clause 3), 'Listed POI' means a POI that is set out in the document titled "Listed Points of Interconnection - NBN Corporation", published by the ACCC on 2 November 2012.
2. An NBN Access Seeker Group is counted as being present at a POI if it has contracted CVC capacity at that POI, or if they are acquiring the Sky Muster Plus product.

Total	3,087,374

- As defined in the Disclosure Direction, (clause 3) 'NBN Access Seeker Group' means two or more Access Seekers which are acquiring Network Access Services and that are related to each other at the end of the relevant calendar quarter.
- If the count of TC-4 AVCs acquired by any NBN Access Seeker Group is less than 1% of the total TC-4 AVCs for that Network Access Service as at the end of the calendar quarter, that count is aggregated in the 'Other Access Seekers' line item.
- The count of TC-4 AVCs for the Satellite Access Service includes Sky Muster Plus services.

Table 5 - Count of TC-4 AVCs by download data transfer rate and by NBN Access Seeker Group, 30 September 2022

Total	800,234	1,244,037	39,106	4,753,195	239,105	1,442,371	166,480	841	53,284	702

Notes:

- As defined in the Disclosure Direction, (clause 3) 'NBN Access Seeker Group' means two or more Access Seekers which are acquiring Network Access Services and that are related to each other at the end of the relevant calendar quarter.
- If the count of TC-4 AVCs acquired by any NBN Access Seeker Group is less than 1% of the total TC-4 AVCs as at the end of the calendar quarter, that count is aggregated in the 'Other Access Seekers' line item.
- AVCs that are supplied with a data transfer rate tier that comprises a single specified download data transfer rate are aggregated with all other AVCs that are supplied with a data transfer rate tier with the same specified download data transfer rate. A data transfer rate tier that comprises a range of download transfer rates is treated as though it comprised a single download data transfer rate that nbn offers on a data transfer rate tier, and this is selected to be equal to the maximum of the range of download data transfer rates available on the relevant data transfer rate tier.
- The 'Wireless Plus' TC-4 AVC relates to the Wireless bandwidth profile that aims to deliver the maximum potential wholesale download speed the Wireless network is capable of delivering to a particular premises at the time of use. This bandwidth profile is not offered as a "range PIR" product, nor can it be characterised as a product with a uniform specified PIR, as the theoretical maximum speed will differ at each premises and may be no more than 25/5 Mbps.
- The Home Ultrafast AVC TC-4 bandwidth profile has a downstream PIR of '500 to ~1000 Mbps'. The range shows the maximum PIR which may be achieved at the nbn network boundary. The PIR can fall anywhere in the range in respect of a particular AVC TC-4 used to serve a premises (they are not minimum-maximum PIR ranges). Inherent limitation of nbn Ethernet in relation to frame overhead means the effective Layer 2 PIR will be limited to, depending on the Frame Size, up to a maximum of 990Mbps (at 2,000 Byte Frame Size). For the HFC Home Ultrafast bandwidth profile, the Layer 2 wholesale downstream service will be configured at the Layer 2 network management to a Maximum Sustained Information Rate of 750Mbps with the potential to burst up to a maximum of 990Mbps (depending on but not limited to, the Frame Size and line speed capability) at potential burst durations between 1 to 50 seconds at least once a day. Please see the WBA for all applicable terms and conditions.
- All 'Sky Muster Plus' plans are based on a wholesale 25/5 Mbps Access Rate (nbn commits to achieve a peak wholesale speed of 25/5 Mbps at least once per day and will investigate otherwise) but may be able to burst higher (subject to available network capacity). Wholesale speeds may be reduced if the metered data allowance is exceeded. Wholesale speeds for some unmetered activities may also be shaped to wholesale speeds of 256Kbps between 4pm and 11pm. Please see the SMP Interim Agreement for all applicable terms and conditions.

Table 6 - Count of TC-4 AVCs by State or Territory and by NBN Access Seeker Group, 30 September 2022

Notes:

- Excludes AVCs supplied on a Satellite Access Service.
- As defined in the Disclosure Direction, (clause 3) 'NBN Access Seeker Group' means two or more Access Seekers which are acquiring Network Access Services and that are related to each other at the end of the relevant calendar quarter.
- If the count of TC-4 AVCs acquired by any NBN Access Seeker Group is less than 1% of the total TC-4 AVCs as at the end of the calendar quarter, that count is aggregated in the 'Other Access Seekers' line item.

Table 7 - Count of TC-4 AVCs by metropolitan/regional designation and by NBN Access Seeker Group, 30 September 2022

	Metro	Outer Metro	Regional
Access Seeker Group	SIO	SIO	SIO
Telstra Corporation Ltd	1,667,607	318,402	1,749,937
TPG Internet Pty Ltd	1,201,622	176,946	614,060
Optus Fixed Infrastructure Pty Limited	747,784	86,547	336,375

Aussie Broadband Limited	310,262	51,283	219,440
Superloop Limited	114,617	14,900	69,338
Southern Phone Company Ltd	41,685	7,675	40,826
Other Access Seekers	123,590	24,161	221,697
Total	4,493,745	733,673	3,511,937

Notes:

1. As defined in the Disclosure Direction (clause 3), 'NBN Access Seeker Group' means two or more Access Seekers which are acquiring Network Access Services and that are related to each other at the end of the relevant calendar quarter.
2. With the exception of Satellite Access Services, AVCs are designated as 'Metro', 'Outer Metro' or 'Regional' based upon the designation that is given to the POI to which they are connected in the document titled "Listed Points of Interconnection - NBN Corporation", published by the ACCC on 2 November 2012.
3. For the purposes of this table, an AVC or SIO that is supplied on a Satellite Access Service is designated as 'Regional'.
4. If the count of TC-4 AVCs acquired by any NBN Access Seeker Group is less than 1% of the total TC-4 AVCs as at the end of the calendar quarter, that count is aggregated in the 'Other Access Seekers' line item.

Notes:

1. Excludes AVCs, CVCs and SIOs supplied on a Satellite Access Service.
2. An NBN Access Seeker Group with contracted CVC capacity on a Satellite Access Service only is not included in the count of NBN Access Seeker Groups with contracted CVC capacity at a Listed POI.
3. As defined in the Disclosure Direction, (clause 3) 'NBN Access Seeker Group' means two or more Access Seekers which are acquiring Network Access Services and that are related to each other at the end of the relevant calendar quarter.
4. An NBN Access Seeker Group is counted as being present at a POI if it has contracted CVC capacity at that POI.
5. A POI is designated as 'Metro', 'Outer Metro' or 'Regional' based upon the designation it is given in the document titled "Listed Points of Interconnection - NBN Corporation", published by the ACCC on 2 November 2012.
6. AVC counts under the subheading 'Fixed' include FTTP, FTTN, FTTB, FTTC and HFC access services.
7. A number of factors can influence the sum of contracted CVC capacity at a POI relative to the count of AVCs at that POI, such as POI location (i.e. Metro/Outer Metro/Regional), number of serviceable premises at the POI, and differences in demographics.
