Hi I would like to make a suggestion in regards to helping reduce the cost of insurance for my area of south Mackay 4740 [Confidential] that being the insurance companies look at breaking the year in two seasons possible one for the cyclone season and the rest of the year I sure most people realise they must pay something for insurance but why pay a high premium for say flood cover in the low areas of Mackay when we have basically no chance of flooding during the dry part of the year and we pay more during the cyclone season to cover the flooding and cyclones.
