Hello ACCC,

If I knew that I could have had my say about the Murray Darling River, I would have emailed before the closing date of 30th October.

I would like to say how disappointed I am that our government would stoop so low to not give water to our Farmers. These are families who feed Australia and the government turns a blind eye. I cant believe that overseas buyers of certain crops are willing to pay exorbitant prices for water, leaving our Farmers helpless.

I am disgusted and ashamed that we have elected these people to treat our farmers so badly. It is incomprehensible what is being done to our Farmers.

Poppy
