## OFFICIAL

Hey [REDACTED]

Below are the only notes I recorded from the TAC#3 meeting for which I have attached the slides. I've also attached the summary of the meeting, and the Humelink presentations I also have.

### Humelink CPA1 Part 2

- Stage 1 - mostly focussed on LLE securing the lowest possible costs (and stable amount) and sustainable, while meeting the delivery dates.
- They are allowed to make staged CPAs.
- Use decision models in making CPAs for different stages.
- Expected to be submitted in Mid-May.
- CPA-2 is on track for September
- Transformers have been secured.

### Humelink CPA2

- Commented that they're facing a race to secure the work and projects. They have secured the contractors they need to build the humelink connections.
  - Intend to use incentivise target cost contracting. They think it drives down the price, as the contractor doesn't have to factor in as much risk in their price.
  - Also incentivised to maintain and meet timeframes.
  - No feedback offered.

The AER acknowledges the traditional owners and custodians of Country throughout Australia and recognises their continuing connection to the land, sea and community. We pay our respects to them and their cultures; and to their Elders past, present and future.
