

PRODUCT SAFETY AUSTRALIA

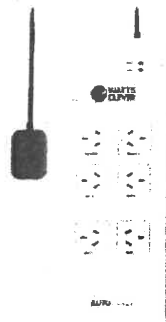

## Watts Clever (Australia) Limited—Standby Power Controller (SPC) (Power Board)

**PRA No.** 2012/13256  
**Date published** 9 Aug 2012

### Product description

Standby Power Controller Power Board that automatically cuts off the electricity to all connected peripheral equipment when the main piece of control equipment is turned off.

### Identifying features

ES-AUS1111 & ES-AUS1110

### What are the defects?

The product does not comply with Australian safety standards as the earthing wire is connected incorrectly.

## What are the hazards?

If the power board is used incorrectly or with faulty appliances, this could result in an electric shock.

## What should consumers do?

Consumers should immediately un-plug and cease using the power-board. Please keep the power-board/s ready for collection. Do not dispose of them. A representative from Watts Clever will visit over the coming months to collect the power board/s.

You can contact Watts Clever at [recall@wattsclever.com](mailto:recall@wattsclever.com) or call 1300 884 963.
