**RE: COUNCIL SOLUTIONS' APPLICATION FOR AUTHORISATION AA1000420-1 ANCILLARY -
DRAFT DETERMINATION**

Dear Ms Cramond,

Regarding the above draft determination we request the National Waste Recycling Industry Council (NWRIC) be added to the list of interested parties.

The National Waste and Recycling Industry Council ([NWRIC](http://www.nwr.gov.au)) is the representative body for national waste and recycling service providers. Its core activity is to proactively engage with all of the industry's key stakeholders to promote solutions to the challenges facing the sector.

The current host companies of the Council: Hanson, Cleanaway, J. J. Richards and Sons, Solo Resource Recovery, Sims Metal Management, Suez, Remondis, ResourceCo and Veolia and State and Territory affiliates - WRIQ, WRCA, VWMA, WRISA, WRIWA and WRINT - represent the majority of the private capital invested into waste management and recycling assets in Australia.

In reference to the *Draft Approval of Councils Solutions'*, we make the following comments.

COMMENT ON DRAFT APPROVAL

Council Solutions, on behalf of the Cities of Adelaide, Charles Sturt, Marion and Port Adelaide Enfield (Participating Councils), seeks authorisation to jointly procure the collection of ancillary waste services, comprising the:

- Multi-unit collection of Bulk Bins and processing or disposal of the waste (including the supply and maintenance of the bins);
- Kerbside collection and processing or disposal of Hard Waste and;
- Collection of park and footpath litter and/or recycling bins and disposal or processing of the waste;
- The application for authorisation is for ancillary services streams only.

COMMENTS -

As a general principle - the NWRIC submits that market innovation and public good is maximised where;

- The number of market opportunities is maximised.
- The number of competitors who can bid for those market opportunities is maximised.
- The transparency and availability of tender documents is maximised.
- Market opportunities occur frequently and evenly. That is, they are spread evenly over time, rather than aggregated into a single event.
- The size of the resultant activity is optimal with respect to asset and supervisory utilisation.

August 17, 2018

Therefore, in general the Council will object to tenders that;

- Minimise the number of competitors who can bid.
- Aggregate all tender opportunities such they they are available on the market infrequently or unevenly.
- Are tendered for such a period that innovation and market agility will be stifled.

In regard to the draft determination; *AA1000420-1 - Ancillary* - the Council does not believe this tender conforms to the above mentioned principles. Therefore, the NWRIC joins with the Waste Recycling Industry Association of SA (WRISA) in objecting to this aggregated joint tender. We welcome further correspondence on this important matter.

Sincerely,

Rose Read
