**Subject:** AEMO Interim Authorisation dated 24 July 2020: report for period 14 - 20 September 2020

We refer to condition 1 of the interim authorisation granted by the ACCC on 24 July 2020 (**Interim Authorisation**) and the reporting protocol contained in Attachment B of the draft determination and interim authorisation.

Set out below is AEMO's report for the period 14 – 20 September 2020 (**Reporting Period**).

This report can be published on the public register.

**1. Material contracts, arrangements, understandings or decisions that rely on the Interim Authorisation**

No material contract, arrangement or understanding that relies on the Interim Authorisation was entered into during the Reporting Period.

The following decisions that rely on the Interim Authorisation were made during the Reporting Period:

- a) A meeting between AEMO, AGL, Alinta and Energy Australia was held on Thursday 17 September specifically to discuss the practical impacts of COVID-19 on occupational health and safety work practices at several Latrobe Valley sites. The meeting participants discussed the safety implications of COVID-19 related restrictions as well as other practical implications on worksites such as additional cleaning requirements; managing the volume, segregation and temperature testing of workers; permit management; and contact tracing.
- b) A meeting between AEMO, Alinta, AusNet, Department of Environment, Land, Water and Planning, Energy Australia, Origin and Basslink (**Victoria Meeting Participants**) was held on Friday 18 September. The purpose of the meeting was to discuss any potential issues that may arise in relation to maintenance or scheduled outages in Victoria, and the resources required, in light of COVID-19. The Victoria Meeting Participants shared information relating to the timing of proposed maintenance, the skills required and any potential disruptions to planned maintenance due to COVID-19 (such as additional time being required to complete work or issues sourcing labour and/or parts, in particular due to border closures and quarantine requirements). The Victoria Meeting Participants also discussed planned AusNet Services, Basslink and Murraylink transmission outages. The next meeting of Victoria Meeting Participants is scheduled for Friday 25 September 2020.
- c) A meeting between AEMO, CS Energy, Department of Natural Resources, Mines and Energy (Queensland) (**DNRME**), Powerlink, InterGen, Stanwell, Origin and APA (together, **Queensland Meeting Participants**) was held on Friday 18 September. The purpose of the meeting was to discuss any potential issues that may arise in relation to maintenance or scheduled outages in Queensland, and the resources required, in light of COVID-19. The Queensland Meeting Participants shared information relating to the timing of proposed maintenance and the specialist skills required. The Queensland Meeting Participants discussed how current maintenance and outages were progressing, the impact of planned maintenance being delayed, extended or moved due to COVID-19 related issues, the processes for carrying out work in light of COVID-19, and engagement with DNRME and Queensland Health in respect of workers entering Queensland. The Queensland Meeting Participants also discussed the fact that there had been new outages added to MT PASA soon before this meeting which could raise concerns in the October/November period, which AEMO considered should be discussed before the next scheduled meeting. Accordingly, there will also be a meeting of Queensland Meeting Participants on Friday 25 September 2020.

**2. Update to the Energy Coordination Mechanism**

The Energy Coordination Mechanism did not meet during the Reporting Period.

Please don't hesitate to contact me with any queries in relation to this report.

Kind regards

**Tony Snell** AM

***Working days at AEMO: Monday, Tuesday, Thursday and Friday***

*In response to the COVID-19 pandemic, AEMO has adopted digital and remote ways of working to protect our people and critical operations. Please be aware that most meetings will now be conducted digitally to minimise physical contact and allow business to continue. Given the dramatic increase in load on our systems, please bear with us while we work through any technical issues that may result.*
