**Subject:** AEMO Interim Authorisation dated 24 July 2020: report for period 20 -26 July 2020

We refer to condition 1 of the interim authorisation granted by the ACCC on 24 July 2020 (**Interim Authorisation**) and the reporting protocol contained in Attachment B of the draft determination and interim authorisation.

Set out below is AEMO's report for the period 20 - 26 July 2020 (**Reporting Period**).

This report can be published on the public register.

1. **Material contracts, arrangements, understandings or decisions that rely on the Interim Authorisation**

No material contract, arrangement or understanding that relies on the Interim Authorisation was entered into during the Reporting Period.

Two decisions that rely on the Interim Authorisation were made during the Reporting Period, as follows:

- (i) A meeting between AEMO, AGL, Alinta, AusNet, Department of Environment, Land, Water and Planning, Energy Australia and Origin (**Victorian Meeting Participants**) was held on Friday 24 July. An ACCC representative also attended this meeting as an observer. The purpose of the meeting was to discuss any potential issues that may arise in relation to maintenance or scheduled outages in Victoria, and the resources required, in light of COVID-19. The Victorian Meeting Participants shared information relating to the timing of proposed maintenance, the skills required and any potential disruptions to planned maintenance due to COVID-19 (such as additional time being required to complete work or issues sourcing labour and/or parts). The Victorian Meeting Participants also discussed the planned Ausnet tower restoration works in October. The next meeting of Victorian Meeting Participants is scheduled for Friday 31 July 2020.
- (ii) A meeting between AEMO, CS Energy, Department of Natural Resources, Mines and Energy (Queensland) and InterGen (together, **Queensland Meeting Participants**) was held on Friday 24 July. The purpose of the meeting was to discuss any potential issues that may arise in relation to maintenance or scheduled outages in Queensland, and the resources required, in light of COVID-19. The Queensland Meeting Participants shared information relating to the timing of proposed maintenance and the specialist skills required. The Queensland Meeting Participants also discussed how current maintenance and outages were progressing, the impact of planned maintenance being delayed, extended or moved due to COVID related issues and the processes for carrying out work in light of COVID-19. The next meeting of Queensland Meeting Participants is scheduled for Friday 7 August 2020.

2. **Update to the Energy Coordination Mechanism**

The Energy Coordination Mechanism did not meet during the Reporting Period.

Please don't hesitate to contact me with any queries in relation to this report.

Kind regards

**Working days at AEMO: Monday, Tuesday, Thursday and Friday**

*In response to the COVID-19 pandemic, AEMO has adopted digital and remote ways of working to protect our people and critical operations. Please be aware that most meetings will now be conducted digitally to minimise physical contact and allow business to continue. Given the dramatic increase in load on our systems, please bear with us while we work through any technical issues that may result.*
