Re: Australian Rally Championship - Elf Fuel

Your ref: C2004/479

Stefanne,

Dimension1, through our rallysport division, fully sponsor a private entry in the ARC competition. At the time of registration for the 2004 series, we were aware of the sponsorship arrangement between ARCom and Elf Fuels. We reply to your letter of today as follows:

Requests 1, 2, 3, & 5 not applicable, see reply to question 6.

Question 4. Confirm the statement by CAMS that the entry fee has been reduced.

Question 6:

We are fully conversant with at least two other fuels that may be available, but do not consider them to be a viable alternative at this stage.

The race motors that we use, apart from being extremely expensive, are exceedingly reliant on exact tuning to obtain maximum performance and reliability.

During numerous meetings, conversations and correspondence with E T Racing Fuels and Sonoco, neither have proved to us, or our motor builders, that they produce an equivalent fuel to ELF to meet the requirements of our rally cars.

Our belief is that by inviting the sponsorship of Elf Fuels, CAMS has not caused any detriments to the public.

Please contact us we can be of any further assistance.

Brett Goldsbrough
 Managing Director.
