**6. A NOTE ON THE DETRIMENT/BENEFIT CONSIDERATIONS IN
RELATION TO THE APPLICATION.**

[REDACTED]

**AHA APPLICATION, NUMBER A90837 IN RELATION TO COLLECTIVE
NEGOTIATION WITH TAB LIMITED.**

FURTHER DETRIMENT/BENEFIT CONSIDERATIONS.

The detriment flowing from the Application is minimal. It is proposed that the AHA (NSW) act as bargaining agent for its members who want to engage in the conduct sought to be authorised.

Currently members are in a captive situation in relation to their dealings with TAB, which has a statutory monopoly in NSW for wagering services. It is also the only NSW supplier of both TV and radio broadcasts of horse and dog racing.

Most AHA (NSW) members are not in competition with each other, however some are. Hence any breach of the TPA is not wide spread. It is doubted that the ACCC would pursue any non authorised collective negotiation but TAB may.

Ironically the TAB now insists that some dealings are done through the AHA acting as a bargaining agent for its members and not on an 'opt out' basis.

It is hoped that out of any negotiation process that a more fair and commercially realistic situation will develop, different supply arrangements for different type and size of outlets, rather than the one fits all take it or leave it situation of today.

It is expected that if AHA members feel that they are getting a fairer deal they will be more in a partnership relationship and not master and servant as now. This should flow on to customer relationships. At present AHA members spend little or nothing on the consumer services as they in turn get little from TAB.

The pricing system penalises the successful and overcharges the small.

A partnership involving TAB, the AHA member and the AHA will foster issues such as Gambling Harm Minimisation, more advertising, better facilities and more customer information and comfort.

At a different level it will foster better relations between TAB and members and avoid disputes over unconscionable conduct.

There is no doubt a concern that if AHA members get a better deal, then consumers will not benefit. This is unlikely as AHA members are in a very competitive situation. They actively compete with clubs and with consumers drinking at home watching racing on Foxtel and betting via the phone. Hotels do not have a captive clientele and have to fight for customers. Prices to consumers are dictated by the market and if members can, they will become more price competitive, both in packaged and over the counter.

As things stand many hotels will cut back on services to customers or even cease dealing with the TAB. This will hurt the Member as well as its customers.

The application also seeks authorisation for exclusionary conduct. This is seen as a last resort and a way to ensure negotiation is successful... Should a boycott eventuate it would only be for a short time. It is likely that customers will go to local clubs if any boycott lasts very long. Members are not forced to join any boycott.

It is arguable that the current TAB system is anti competitive as it effectively prevents members from competing on wagering services and associated services such as bar sales. The current system totally stifles competition and TAB cherry picks where it insists on collective dealing and where it does not. TAB thereby dictates the competitive dynamics in the market to suit itself, certainly not the consumer or the AHA member.

It may be said that a possible outcome of the application is that the TAB cut the number of outlets and the consumer suffers, as will AHA members. It is doubted that that will occur, TAB have over recent years substantially reduced the number of agency outlets, in favour of using AHA members. This cuts TAB costs and exposure to cost increases.

Fielke Attacks PubTAB Dispute

Wednesday, 4 September 2002: Racing Victoria chief executive Neville Fielke has called on all parties involved in the current Victorian PubTAB dispute over Sky Channel fees to work together to find an equitable solution.

"It is now time for all parties to move away from a combative media approach to a new climate where the needs of the punter and the growth of our industry are paramount," Fielke said in a statement issued on Tuesday.

Fielke said that the recent biased statements by the Australian Hotels Association did not paint a true picture of the situation, nor do they adequately address what is a complex distribution and financial issue.

"This issue has arisen in circumstances specific to Victoria and is a problem that has been simmering over a number of years," he said.

"Any suggestion by other parties to this dispute that there is an easy solution are false.

"Let me repeat - there is no quick fix and whilst racing is not the only party to admit there is a problem, we are one of the only parties to be putting up viable and workable solutions.

"We've identified that it is the smaller country PubTABS - those without gaming facilities - as the ones being squeezed here.

"The AHA are trying to put every PubTAB under the same umbrella when quite clearly, the large entertainment complexes in provincial and metro areas are in a completely different category.

"There is no such thing as an "average" PubTAB or hotel."

However, Fielke said that TABCorp and Sky Channel also had to play their part in any resolution of the issue.

"Let's not forget that when Sky signed a new contract for our racing vision, they saved almost 50 percent compared to the previous deal and have not passed this saving onto PubTAB operators in Victoria.

"However they have provided some price certainty going forward."

In relation to incentives that provide for wagering growth, Fielke said that all parties to the dispute need to come to the table with real solutions, not

just rhetoric and expectations of a blank cheque handout.

"TABCorp need to reassess their focus from restructuring and cost-cutting to growing wagering turnover and driving innovation while Sky Channel's fee structure is such that PubTAB's are given no incentive to grow the wagering side of their businesses.

"In fact, Sky is "double-dipping" and penalising growth by charging more.

"We want to re-write the rules for the hardship group of small PubTAB operators with no gaming facilities as a first priority.

"We're committed to solving the problem for the long term benefit of all parties and we are working hard to find a solution, for the smaller hardship operator first, and later to the wagering industry in general."

Fielke said Racing Victoria hoped to announce a package of initiatives shortly that are aimed at growing wagering and providing immediate assistance to smaller non-gaming PubTABs.

"The time for media posturing has ended," he said.

"It's now time to begin to address the fundamental issues and for real solutions to be put on the table."
