Mr Irwin called in relation to the Port Waratah Coal Services Limited (PWCS) application for revocation and substitution of authorisations to re-instate a revised Medium Term Capacity Balancing System (CBS) at the Port of Newcastle.

Mr Irwin noted that Pacific National is comfortable with the reintroduction of a revised Medium Term CBS. Pacific National considers the revised scheme will not restrict its ability to deliver coal to the port.

Mr Irwin also commented that from an industry point of view, the current queue level is not sustainable. Pacific National also believes that the revised Medium Term CBS will not reduce aggregate coal volumes exported through the Port of Newcastle.
