I wish to lodge my objections to the proposal of E/Bay having Pay Pal as their only option of payment for goods bought or sold on their website.

I can't see how the TPA can possibly call this fair trading, what about all the older generation who don't feel comfortable about using online methods of payment. Its not about safety its about E/Bay making more money.

If they are allowed to go ahead with this being the only method of payment then that will be the end of the ordinary everyday seller, it will become another outlet for shops and businesses only, and there will be no room for private sellers. Postage costs are way over the top now, and they will become worse if this happens, because sellers will just charge more for postage and handling to make up the shortfall for the extra fees they have to pay to use Pay Pal.

I hope if they are allowed to do it then they fall flat on their faces and trade themselves out of business. I for one won't use it anymore and I know heaps of other people who have said that they won't either.

Yours Sincerely,  
Robyn Koellner,
