Aloha, members of the commission!

My principal eBay IDs are shopping-hawaii and honoluludance.

I would like to support fellow sellers in Australia who have opposed eBay's application for immunity from anticompetition regulations.

No doubt, you've been alerted to the case of the eBay Germany executive who added security requirements for PayPal payments in his eBay listing:

<http://blog.auctionbytes.com/cgi-bin/blog/blog.pl?/comments/2008/6/1212688011.html>

If a buyer needs to submit a passport and credit-card security code in order for a seller to feel safe, how safe can PayPal be?

Certainly no safer than Paymate, for example.

Please finalize this decision. If eBay has to take this to court, so be it.
