Subject: eBay Notification

Hi,

This submission is in support of the ACC's draft response to revoke eBay's recent action in cutting off my ability to list auctions viewable by Australians.

I am a UK eBayer who has made thirty plus international deals with Australians, including one in Tasmania even! There has never been any problems, all but one paying me via eBay's Paypal. That one paid by a Bank Cheque made out in pounds Sterling, proving that everything is possible if keen enough.

I can't imagine what eBay is playing at, it rarely explains it's action to its member anyway. I am quite upset about this development, so much for Tony Blair's Global Village!
