I'm not sure if this is the right place to lodge a concern - if it is I urge ACCC to stop ebay from making Paypal the only way to pay for goods.

It is a rip off - I had a decision go against me regarding a computer (cost of \$700) that died the day after I received it. This was done without ANY investigation of any sort. Makes the claim of protection pretty lame.

Also, the charges they make are a bit steep as well.

Keep up the good work.

Kind regards
