

Customers Limited appreciates the opportunity to be able to provide a submission on the proposed interim authorisation in relation to the abovementioned applications.

Whilst Customers Limited does not accept the need for the urgency around the request for interim authorisation, we do not oppose the Commission granting such an interim authorisation.

We do note, however, that the principal applicant appears to have pre-empted a decision by the Commission by including the number of NAB ATMs in a statement, as to the number of ATMs in the rediATM Network, currently provided on the Cuscal website:

**“Cuscal's rediATM network is one of the largest in Australia with 3,100 ATMs nationally.”**

Signed  
Tim Wildash  
Chief Executive Officer and Managing Director  
Customers Limited
