Subject: re Agsafe Limited application - yr ref 42241

Afternoon Ben,
The Nursery & Garden Industry Australia (NGIA) support the application by Agsafe Limited for Interim Authorisation to continue to enforce the Agsafe Code of Conduct.

We also support the application for Agsafe to continue to enforce the Code for a further three years with the transition to an incentive based scheme.

The management and effective control of pesticides is critical in the areas of food , environment and public safety. As with medications there need to be effective controls to ensure safe storage and distribution to qualified persons for products which may be used for purposes which they were not intended.

NGIA supports the training of growers with Chemcert qualifications to ensure on property use is in accordance with Best Practice and the Code as Managed by Agsafe is a quality control process in the supply chain.

Regards,

Robert Prince
