Hi John

Our position on the new increased Seed Levy for South Australia only is as follows:

Needs to be more equitable across the board from an Australian Industry perspective and the extra Levy justified.

Currently Tasmania is \$1.25/1000+GST (\$0.25 CRC short term only), South Australia \$1.00/1000+GST (Proposed \$1.50/1000+GST then CPI annually?), NSW \$0.00/1000 Why?

These issues led to inequities in the market place.

Note that the majority of all seed stock sold/produced originates from Tasmania.

**Also is the Levy compulsory and is it being checked that all paying?**
