**Subject:** Grain Express

I am a grain grower in West Arthur shire .

I am supporting grain express.

>CBH have been able to keep handling charges at realistic levels. If we loose Grain Express

>handling charges will increase (efficiencies in moving grain will be lost, that is why grain express was introduced.

Load optimizing will not be introduced .

>The grain is ours, CBH is our facility ,we should be able to capture the extra value of the grain.

Under the old regulated system ie AWB, grain pool CBH could position grain ready for export in an efficient manner. Just because we have deregulation growers should not be penilised by not allowing an efficient and timely method of position grain.

The rail system requires an orderly system to allow CBH to have grain in position for export.
