Dear Jessica,

Following our telephone conversation, I am now responding on behalf of the Australian Airports Association to your letter dated 11 December, 2009 reference the above subject heading. Please be advised that we have canvassed the views of the affected airports and, on this occasion, the Association is not in a position to present a unanimous or consistent viewpoint for the consideration of the Commission.

Accordingly, we have encouraged those individual airports to advise the Commission of their views, taking into account their local current contractual, geographic and operational circumstances. We would expect that the Commission will give due consideration of any such submissions and treat each one on its individual merit.

In the meantime, we thank the Commission for the invitation and opportunity to participate in the consultative process.

Kind regards  
Ken Keech  
AAA CEO
