4. Public benefit claims

- (a) Arguments in support of notification:
(Refer to direction 7)

By providing a choice of home builders that can build in Pollock Way Clarkson, the future residents (and a proportion of the persons affected at question 3 above) are reassured:

- That all houses built are by a quality builder.
- That their neighbours are building with the same builder and the builder takes an outcome based approach in designing an attractive streetscape with no elevations looking the same.
- That the builders they can choose from know the planning and building requirements of the local authority and as such are less likely to be held up by approvals.

The general locality is also improved as the buildings have been purpose designed for the Estate and will provide a well-designed and presentable streetscape.

Lastly – Satterley Property Group have other blocks of land on the streets in question where people can purchase and build with other builders.

- (b) Facts and evidence relied upon in support of these claims:

- The stated home builder has been in the industry for 20 years and has amassed a number of major industry awards from building industry bodies such as the Housing Industry Association and the Master Builders Association and as such can be judged to be reputable and quality builder.

- Given there are only a certain number of builders any purchaser of a house and land package can choose from assures that purchaser of the quality of builder that a neighbour will build with.

5. Market definition

Provide a description of the market(s) in which the goods or services described at 2 (a) are supplied or acquired and other affected markets including: significant suppliers and acquirers; substitutes available for the relevant goods or services; any restriction on the supply or acquisition of the relevant goods or services (for example geographic or legal restrictions):
(Refer to direction 8)

- Residential housing market in Clarkson and surrounding areas
- House and land packages are generally provided in new residential estates as such there are numerous locations where affected persons can go without having to build with the stated home builder.
- Likewise, other builders are not affected as there other opportunities for their houses to be built in residential estates including house and land packages in the locality of Clarkson and the particular streets in question and surrounding areas.

6. Public detriments

- (a) Detriments to the public resulting or likely to result from the notification, in particular the likely effect of the notified conduct on the prices of the goods or services described at 2 (a) above and the prices of goods or services in other affected markets:
(Refer to direction 9)

- There is no perceived detriment as there are other options for the public to purchase a house and land package within the locality of Clarskon and the particular streets in question and surrounding suburbs.
- Given there is healthy competition in the house and land market and there is land available in the locality, the price of the house and land packages needs to be comparable to similar house and land packages offered by competitors – therefore no impact/ detriment to the public with regard to price.

- (b) Facts and evidence relevant to these detriments:

It is accepted the house and land package market in Western Australia is very competitive and therefore the provision of 10 single residential lots to one builder (as proposed) does not present a significant, if any impact to the public or competitors.

Valuation by banks ensures no over pricing.
