Homeworker Code Committee Incorporated - Revocation & Substitution - A91354 - A91357

New Model Beauty Queen is a fast growing manufacturer of apparel with a particular focus on first season labels and start up companies. We feel a strong level of protection for home workers is critical in maintaining a sustainable industry & create an even playing field between small factory like ours and a home worker based operations that have been rife with exploitation. An unregulated environment will make us less competitive with in the global market place as ethically driven manufacturing is fast becoming the benchmark of the new generation fashion.

Ethical Clothing Australia has been integral in the facilitation of an ethically focused fashion industry. Having worked with them for many years, their support has very much been a part of our growth. The Australian fashion industry needs to make a decision whether it wants to go back to the good old days where wide spread exploitation was the norm or focus on a progressive industry with an eye on the global market place selling the unique Australian aesthetic.

Kind regards,

Dale Cornell & Sharmaine Cornell
