 - Electricity
 - Electricity – Renewable generation (“Greenchoice”)
 - Natural Gas

- TransACT services
 - Fixed line telephony services
 - Broadband internet access
 - Mobile telephony service
 - ISP services

4. PROPOSED CONDUCT

4.1 Summary of Proposed Conduct

ActewAGL and TransACT would invite residential Customers within the Queanbeyan area of NSW to acquire services from each of the parties in one of the package combinations (“Bundle”) set out in the table at paragraph 4.2. Depending upon the number of services acquired, the Customer would be eligible for a discount applied to either the ActewAGL electricity component (including Greenchoice where applicable) or the TransACT account for the selected services. The discount will not be applied to any government taxes, and miscellaneous fees and charges included in those accounts.

Selection of the Bundle of services is at the option of the Customer.

The level of discount applicable to the various Bundles of selected services is specified in the table below. Each of ActewAGL and TransACT will continue to independently determine the prices at which they sell their respective products and services.

In order to obtain the applicable discount, the Customer must enter into a 24 month service agreement (“Bundle Agreement”), noting that electricity, natural gas (where Customer has an existing connection) and TransACT fixed-line telephony and broadband are compulsory services to include in each Bundle. The Customer will enter into separate service agreements with ActewAGL (to acquire the ActewAGL services), TransACT (to acquire the TransACT services) and, where applicable, Grapevine (to access the ISP services). Existing payment options, including direct debit and online payment systems will be available.

The price of each of the services will be readily apparent to the Customer. The Customer would receive a bill from each Service Provider in relation to the selected services, within the normal billing cycles.

From time to time ActewAGL and TransACT may also offer Customers other special prices, packages, discounts, giveaways or products in relation to a Bundle in addition to those set out in this document.

The services would be jointly marketed by both ActewAGL and TransACT.

4.2 Discount Scheme to be applied

The discount to be applied to the available packages of services is set out below:

- | | | | |
|---|---|---|---------------------------------------|
| E | = Electricity | T | = Fixed Line Telephone |
| G | = Gas (where there is an existing connection) | M | = Mobile |
| B | = Broadband | C | = Greenchoice electricity (renewable) |
| I | = Internet Service Provision by Grapevine | | |

It should be noted that Bundle services are only available to customers who reside within the TransACT network.

Offer	Valid Combinations	Discount
3 Eligible Services	ETB	7% discount on either electricity or total TransACT account
4 Eligible Services	ETGB; ETIB; ETMB; ETBC	12% discount on either electricity or total TransACT account
5 Eligible Services	ETGMB; ETGCB; ETGBI; ETIBM; ETIBC; ETMCB	15% discount on either electricity or total TransACT account
6 Eligible Services	ETGMCB; ETGBIC; ETIBM; EGTIMB	20% discount on either electricity or total TransACT account
7 Eligible Services	EGTIMCB	20% discount on either electricity or total TransACT account

NOTE: The total discount available to customers in any 12-month period is capped at \$500.

Every Bundle must include electricity, TransACT fixed line telephony, broadband and natural gas (where natural gas is connected).

ISP Services

Areas of Queanbeyan served by the TransACT Network

- 4.2.1 Broadband is only available as part of a packaged service with TransACT fixed line telephony. These components count as separate services for the purposes of making up a Bundle.
- 4.2.2 In the event Customers in these areas wish to include a Grapevine ISP plan in a bundle only Grapevine broadband plans on the TransACT network are eligible. In this event the broadband service and ISP plan will count as two separate services.
- 4.2.3 Grapevine dial-up ISP plans are not eligible to be bundled under the proposed offer.

Other Details

All Greenchoice plans except the 10% consumption based plan are eligible to be bundled under this offer.

All residential TransACT mobile phone service plans will be eligible, except Multi-SIM plans, and plans in respect of Blackberry devices.

Subject to the above, mobile telephony, Greenchoice and Grapevine ISP plans on the TransACT network are eligible to make up a Bundle of between two and seven services.

Upon signing the Bundle Agreement, Customers must choose whether to have the discount applied to their ActewAGL electricity account (including Greenchoice where this service has been included in the Bundle) or their TransACT account.

The discount will commence when all services included in the Bundle have been activated in the service providers' systems.

In addition to the above, Customers will be eligible for waiver of the Natural gas standard service application fee of \$295 if a gas service is included in a bundle contract as a new service (fee is only payable by new ActewAGL customers).

For TransACT Services, standard installation fees will be also be waived, representing further significant savings for the Customer.

A copy of the Bundle terms and conditions is at Attachment B.

4.3 Compulsory Requirement of TransACT Service

In order to qualify for the applicable discount, the Customer must enter into a 24 month contract for the TransACT Services, which must include fixed-line phone and broadband, and may include mobile phones.

4.4 Compulsory Requirement of ActewAGL Service

In order to qualify for the applicable discount, the Customer is required to enter into a 24 month contract with ActewAGL for both electricity and natural gas, where the Customer has an existing account for natural gas, or where the Customer does not have an existing natural gas connection, a 24 month contract with ActewAGL for electricity.

4.5 Where Grapevine ISP Services are selected

In order to qualify for the applicable discount, if selecting a Bundle which includes ISP services from Grapevine (including Grapevine plans on the National network), the Customer may be required to enter into a 24 month contract with Grapevine ISP.

4.6 Fixed Term Supply Agreement

The supply of services to a Customer is subject to a 24 month term. This lowers the running costs of providing available services by reducing overheads associated with Customer management. In order to meet associated administrative costs, a cancellation administration fee will be payable by a Customer who terminates the Bundle Agreement prior to the expiry of the initial 24-month term. The amount of the cancellation administration fee will depend on the number of services that were included in the Bundle.

However cancellation administration fees will not apply where it is no longer possible for TransACT, ActewAGL or Grapevine to provide the Service(s), for example, where a Customer moves to an area that cannot be supplied by TransACT or ActewAGL.

4.7 Provision of Information to Customers

The Bundle offers available to TransACT, ActewAGL and Grapevine Customers will be communicated through call centres, marketing campaigns, the parties' respective websites and other means. TransACT, ActewAGL and Grapevine will ensure their Customers are aware of:

- the offer if the Customer elects to bundle services from TransACT, ActewAGL and Grapevine; and
- any terms and conditions applicable to the offer.

Customers will therefore be in full possession of all material relevant to a purchase decision prior to purchasing any Services.

5. PUBLIC BENEFITS

The impact of the proposed conduct is not such that, under the test laid down in section 93(3A)(b) of the *Competition and Consumer Act 2010*, the likely benefit to the public will be outweighed by the likely detriment to the public.

The proposed conduct would result in the following major public benefits:

- discounts applied to essential services;
- encouragement of significant investment in advanced local broadband communications infrastructure;
- facilitation of competition within the telecommunications and energy industries; and
- promoting energy sourced from renewable generation.

5.1 Rewards applied to Essential Services

Persons who elect to purchase one of the available Bundle of services will benefit from the application of rewards, as specified at paragraph 4.2. The specific discount to be applied to the available services depends upon the number of Services the Customer includes in the Bundle.

Electricity, gas, ISP, telephony (fixed-line and mobile), broadband and other telecommunications services will continue to be available to customers separately from ActewAGL, TransACT and Grapevine, as well as through other service providers.

5.2 Costs savings to customers

The bundling of energy supply contracts with the services of TransACT and/or Grapevine should create a degree of stability in both ActewAGL's electricity and natural gas customer supply base and TransACT's customer base, allowing ActewAGL and TransACT greater scope to secure and offer more competitive energy and telecommunications pricing.

5.3 Increased competition in the markets in which the ActewAGL services are supplied

ActewAGL believes the proposed conduct may provide Customers with an opportunity of acquiring services from ActewAGL at a lower price than the price currently charged by other competitors. This should, in-turn, stimulate competition in the supply of energy in NSW.

5.4 Competition within the Telecommunications Industry

The proposed conduct of ActewAGL and TransACT will promote the long term interests of telecommunications users by increasing competition in the telecommunications industry and promoting investment in advanced broadband communications infrastructure.

The proposed conduct will also encourage competition in the various markets in which other components of the services are supplied. For example, while qualifying for the discount set out in paragraph 4.2, Customers may continue to have other services supplied by other energy providers or telecommunications companies.

The proposed conduct therefore does not reduce the choice available to Customers as it allows them to construct packages of telecommunications services and energy services from a range of providers.

5.5 Promoting Renewable Energy

Greenchoice electricity is ActewAGL's 'green energy' product, and has been generated from renewable sources such as wind power, solar, mini-hydro and biomass – these sources do not produce the greenhouse gases that contribute to global warming.

The Greenchoice product has been independently assessed by the National Green Power Accreditation Program, which ensures that the renewable energy purchased by ActewAGL comes from government approved renewable energy sources.

The inclusion of Greenchoice as an eligible service for this promotion sends a clear signal to the community of the importance with which ActewAGL considers reducing greenhouse gas emissions.

It also evidences ActewAGL's commitment to providing its Customers with substantial opportunities to reduce their greenhouse gas emissions and environmental footprint.

Although Greenchoice is an individual service, the relevant charges will be subject to the relevant discount where the Customer includes Greenchoice in a Bundle and chooses to have their discount applied to their electricity bill.

6. PUBLIC DETRIMENT

It is ActewAGL's view that there will be no detriment to the public arising from the proposed conduct. The markets affected by the proposed conduct are those of electricity and natural gas, and telecommunications (including mobile and fixed-line telephony and internet services).

6.1 No lessening of competition in energy supply

The electricity and natural gas markets in NSW are fully contestable with numerous suppliers of both electricity and natural gas.

ActewAGL believes there will be no lessening of competition given the number of energy suppliers in and around NSW, the large customer base of many of those suppliers, and that full retail contestability has already occurred in NSW with retailers being seasoned operators within a contestable environment.

In ActewAGL's view, it is open to other energy retailers to offer a similar bundling of services with other telecommunication and/or internet service providers within the energy market of NSW.

6.2 No Lessening of Competition in the Internet Services Market

Grapevine competes with numerous local (such as Velocity, Netspeed, Apex and Cyber One) and national internet service providers (such as Telstra, Optus, Internode and TPG).

The bundled services will not be detrimental to competition given the large number of other internet service providers, and the highly competitive nature of this market.

6.3 ActewAGL is dedicated to customer protection

ActewAGL is committed to ensuring that all customers and potential customers are provided with ample information relevant to the decision to purchase electricity and natural gas.

ActewAGL strives to ensure that its managers, representatives and approved dealers are aware of their responsibilities under the *Competition and Consumer Act 2010* and their obligations to protect both the competitive process and the interests of consumers.

ActewAGL holds trade practices training sessions for its staff at which issues of consumer protection are discussed. ActewAGL also provides a trade practices compliance guide to employees emphasising these issues.

6.4 Conduct Voluntary

It should be noted that the proposed conduct would be voluntary on the part of the Customer. The services will continue to be available separately from ActewAGL, TransACT, and Grapevine.

4. PROPOSED CONDUCT

4.1 Summary of Proposed Conduct

TransACT and ActewAGL would invite residential Customers within the Queanbeyan area of NSW to acquire services from each of the parties in one of the package combinations (“Bundle”) set out in the table at paragraph 4.2. Depending upon the number of services acquired, the Customer would be eligible for a discount applied to either the ActewAGL electricity component (including Greenchoice where applicable) or the TransACT account for the selected services. The discount will not be applied to any government taxes, and miscellaneous fees and charges included in those accounts.

Selection of the Bundle of services is at the option of the Customer.

The level of discount applicable to the various Bundles of selected services is specified in the table below. Each of ActewAGL and TransACT will continue to independently determine the prices at which they sell their respective products and services.

In order to obtain the applicable discount, the Customer must enter into a 24 month service agreement (“Bundle Agreement”), noting that electricity, natural gas (where Customer has an existing connection) and TransACT fixed-line telephony and broadband are compulsory services to include in each Bundle. The Customer will enter into separate service agreements

with ActewAGL (to acquire the ActewAGL services), TransACT (to acquire the TransACT services) and, where applicable, Grapevine (to access the ISP services). Existing payment options, including direct debit and online payment systems will be available.

The price of each of the services will be readily apparent to the Customer. The Customer would receive a bill from each Service Provider in relation to the selected services, within the normal billing cycles.

From time to time TransACT and ActewAGL may also offer Customers other special prices, packages, discounts, giveaways or products in relation to a Bundle in addition to those set out in this document.

The services would be jointly marketed by both TransACT and ActewAGL.

4.2 Discount Scheme to be applied

The discount to be applied to the available packages of services is set out below:

- | | | | |
|---|---|---|---------------------------------------|
| E | = Electricity | T | = Fixed Line Telephone |
| G | = Gas (where there is an existing connection) | M | = Mobile |
| B | = Broadband | C | = Greenchoice electricity (renewable) |
| I | = Internet Service Provision by Grapevine | | |

It should be noted that Bundle services are only available to customers who reside within the TransACT network.

Offer	Valid Combinations	Discount
3 Eligible Services	ETB	7% discount on either electricity or total TransACT account
4 Eligible Services	ETGB; ETIB; ETMB; ETBC	12% discount on either electricity or total TransACT account
5 Eligible Services	ETGMB; ETGCB; ETGBI; ETIBM; ETIBC; ETMCB	15% discount on either electricity or total TransACT account
6 Eligible Services	ETGMCB; ETGBIC; ETIBM; EGTIMB	20% discount on either electricity or total TransACT account
7 Eligible Services	EGTIMCB	20% discount on either electricity or total TransACT account

NOTE: The total discount available to customers in any 12-month period is capped at \$500.

Every Bundle must include electricity, TransACT fixed line telephony, broadband and natural gas (where natural gas is connected).

ISP Services

Areas of Queanbeyan served by the TransACT Network

- 4.2.1 Broadband is only available as part of a packaged service with TransACT fixed line telephony. These components count as separate services for the purposes of making up a Bundle.
- 4.2.2 In the event Customers in these areas wish to include a Grapevine ISP plan in a bundle only Grapevine broadband plans on the TransACT network are eligible. In this event the broadband service and ISP plan will count as two separate services.
- 4.2.3 Grapevine dial-up ISP plans are not eligible to be bundled under the proposed offer.

Other Details

All Greenchoice plans except the 10% consumption based plan are eligible to be bundled under this offer.

All residential TransACT mobile phone service plans will be eligible, except Multi-SIM plans, and plans in respect of Blackberry devices.

Subject to the above, mobile telephony, Greenchoice and Grapevine ISP plans on the TransACT network are eligible to make up a Bundle of between two and seven services.

Upon signing the Bundle Agreement, Customers must choose whether to have the discount applied to their ActewAGL electricity account (including Greenchoice where this service has been included in the Bundle) or their TransACT account.

The discount will commence when all services included in the Bundle have been activated in the service providers' systems.

In addition to the above, Customers will be eligible for waiver of the Natural gas standard service application fee of \$295 if a gas service is included in a bundle contract as a new service (fee is only payable by new ActewAGL customers).

For TransACT Services, standard installation fees will be also be waived, representing further significant savings for the Customer.

A copy of the Bundle terms and conditions is at Attachment B.

4.3 Compulsory Requirement of TransACT Service

In order to qualify for the applicable discount, the Customer must enter into a 24 month contract for the TransACT Services, which must include fixed-line phone and broadband, and may include mobile phones.

4.4 Compulsory Requirement of ActewAGL Service

In order to qualify for the applicable discount, the Customer is required to enter into a 24 month contract with ActewAGL for both electricity and natural gas, where the Customer has an existing account for natural gas, or where the Customer does not have an existing natural gas connection, a 24 month contract with ActewAGL for electricity.

4.5 Where Grapevine ISP Services are selected

In order to qualify for the applicable discount, if selecting a Bundle which includes ISP services from Grapevine (including Grapevine plans on the National network), the Customer may be required to enter into a 24 month contract with Grapevine ISP.

4.6 Fixed Term Supply Agreement

The supply of services to a Customer is subject to a 24 month term. This lowers the running costs of providing available services by reducing overheads associated with Customer management. In order to meet associated administrative costs, a cancellation administration fee will be payable by a Customer who terminates the Bundle Agreement prior to the expiry of the initial 24-month term. The amount of the cancellation administration fee will depend on the number of services that were included in the Bundle.

However cancellation administration fees will not apply where it is no longer possible for TransACT, ActewAGL or Grapevine to provide the Service(s), for example, where a Customer moves to an area that cannot be supplied by TransACT or ActewAGL.

4.7 Provision of Information to Customers

The Bundle offers available to TransACT, ActewAGL and Grapevine Customers will be communicated through call centres, marketing campaigns, the parties' respective websites and other means. TransACT, ActewAGL and Grapevine will ensure their Customers are aware of:

- the offer if the Customer elects to bundle services from TransACT, ActewAGL and Grapevine; and
- any terms and conditions applicable to the offer.

Customers will therefore be in full possession of all material relevant to a purchase decision prior to purchasing any Services.

5. PUBLIC BENEFITS

The impact of the proposed conduct is not such that, under the test laid down in section 93(3A)(b) of the *Competition and Consumer Act 2010*, the likely benefit to the public will be outweighed by the likely detriment to the public.

The proposed conduct would result in the following major public benefits:

- discounts applied to essential services;
- encouragement of significant investment in advanced local broadband communications infrastructure;
- facilitation of competition within the telecommunications and energy industries; and
- promoting energy sourced from renewable generation.

5.1 Rewards applied to Essential Services

Persons who elect to purchase one of the available Bundle of services will benefit from the application of rewards, as specified at paragraph 4.2. The specific discount to be applied to the available services depends upon the number of Services the Customer includes in the Bundle.

Electricity, gas, ISP, telephony (fixed-line and mobile), broadband and other telecommunications services will continue to be available to customers separately from ActewAGL, TransACT and Grapevine, as well as through other service providers.

5.2 Costs savings to customers

The bundling of energy supply contracts with the services of TransACT and/or Grapevine should create a degree of stability in both ActewAGL's electricity and natural gas customer supply base and TransACT's customer base, allowing ActewAGL and TransACT greater scope to secure and offer more competitive energy and telecommunications pricing.

5.3 Increased competition in the markets in which the ActewAGL services are supplied

TransACT believes the proposed conduct may provide Customers with an opportunity of acquiring services from ActewAGL at a lower price than the price currently charged by other competitors. This should, in-turn, stimulate competition in the supply of energy in NSW.

5.4 Competition within the Telecommunications Industry

The proposed conduct of TransACT and ActewAGL will promote the long term interests of telecommunications users by increasing competition in the telecommunications industry and promoting investment in advanced broadband communications infrastructure.

The proposed conduct will also encourage competition in the various markets in which other components of the services are supplied. For example, while qualifying for the discount set out in paragraph 4.2, Customers may continue to have other services supplied by other energy providers or telecommunications companies.

The proposed conduct therefore does not reduce the choice available to Customers as it allows them to construct packages of telecommunications services and energy services from a range of providers.

5.5 Promoting Renewable Energy

Greenchoice electricity is ActewAGL's 'green energy' product, and has been generated from renewable sources such as wind power, solar, mini-hydro and biomass – these sources do not produce the greenhouse gases that contribute to global warming.

The Greenchoice product has been independently assessed by the National Green Power Accreditation Program, which ensures that the renewable energy purchased by ActewAGL comes from government approved renewable energy sources.

The inclusion of Greenchoice as an eligible service for this promotion sends a clear signal to the community of the importance with which ActewAGL considers reducing greenhouse gas emissions.

It also evidences ActewAGL's commitment to providing its Customers with substantial opportunities to reduce their greenhouse gas emissions and environmental footprint.

Although Greenchoice is an individual service, the relevant charges will be subject to the relevant discount where the Customer includes Greenchoice in a Bundle and chooses to have their discount applied to their electricity bill.

6. PUBLIC DETRIMENT

It is TransACT's view that there will be no detriment to the public arising from the proposed conduct. The markets affected by the proposed conduct are those of electricity and natural gas, and telecommunications (including mobile and fixed-line telephony and internet services).

6.1 No lessening of competition in energy supply

The electricity and natural gas markets in NSW are fully contestable with numerous suppliers of both electricity and natural gas.

TransACT believes there will be no lessening of competition given the number of energy suppliers in and around NSW, the large customer base of many of those suppliers, and that full retail contestability has already occurred in NSW with retailers being seasoned operators within a contestable environment.

In TransACT's view, it is open to other energy retailers to offer a similar bundling of services with other telecommunication and/or internet service providers within the energy market of NSW.

6.2 No Lessening of Competition in the Internet Services Market

Grapevine competes with numerous local (such as Velocity, Netspeed, Apex and Cyber One) and national internet service providers (such as Telstra, Optus, Internode and TPG).

The bundled services will not be detrimental to competition given the large number of other internet service providers, and the highly competitive nature of this market.

6.3 TransACT is dedicated to customer protection

TransACT is committed to ensuring that all customers and potential customers are provided with ample information relevant to the decision to purchase telecommunications products.

TransACT strives to ensure that its managers, representatives and approved dealers are aware of their responsibilities under the *Competition and Consumer Act 2010* and their obligations to protect both the competitive process and the interests of consumers.

TransACT holds trade practices training sessions for its staff at which issues of consumer protection are discussed. ActewAGL also provides a trade practices compliance guide to employees emphasising these issues.

6.4 Conduct Voluntary

It should be noted that the proposed conduct would be voluntary on the part of the Customer. The services will continue to be available separately from ActewAGL, TransACT, and Grapevine.
