Darrell Channing
Director - Adjudication Branch
Australian Competition & Consumer Commission
GPO Box 3131
Canberra ACT 2601

Dear Mr Channing

Tooltechnic application for authorisation (A91433) - Response to request for information

We refer to your letter dated 4 August 2014 in which you requested that our client, Tooltechnic Systems (Aust) Pty Ltd (**Tooltechnic**) respond to 18 questions in relation to its application for authorisation.

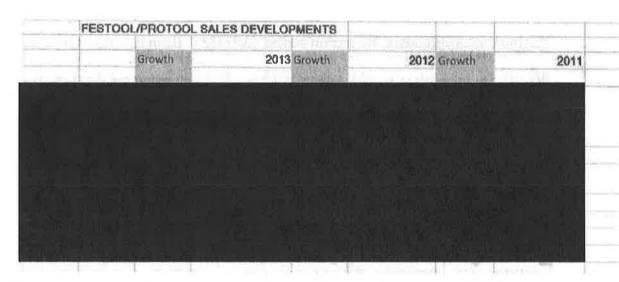

On 15 August 2014, we lodged our response to questions 1, 2 and 9 to 15. We now provide a full response to all 18 questions including the responses in our first letter. We have made minor additions to the responses set out in our first letter mainly to refer to the witness statements and emails in the Annexures.

The responses below contain confidential commercial information of our client and the personal information of Tooltechnic employees, dealers and customers. We therefore request that this letter remains confidential. We have provided you with a redacted version of this letter for publication on the Commission's public register.

Information relating to the claimed inefficiencies

- 1. Please explain what effects Tooltechnic have observed during periods of discounting. (e.g. does wholesale demand from the discounter increase? Does wholesale demand from proximate premium stores decrease?).
- Some dealers that engage in discounting of Festool products offer discounts during a short period of time. However, the more detrimental discounting that is occurring is by dealers who engage in discounting, coupled with reduced retail service, as an ongoing strategy. The most active discounters for Festool in the Australian market are

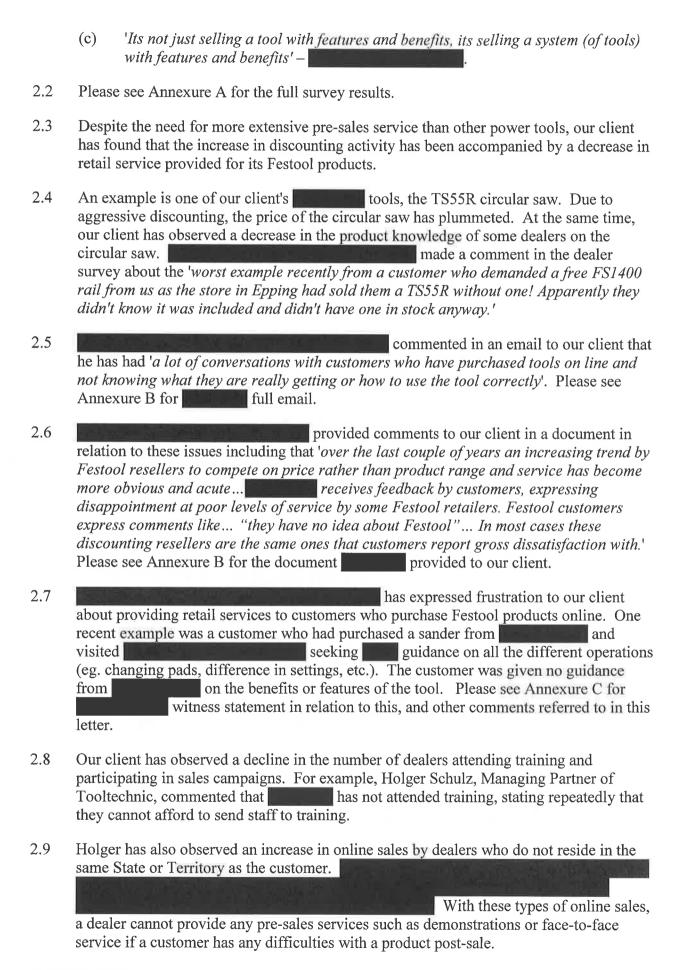

- 1.2 In the case of the internet in regards to offering low prices. In the case of the focus on internet sales and offer an ongoing price promise to beat every quote by 11%.
- 1.3 Our client has noticed that since this long term discounting strategy has been adopted by some dealers, there has been a significant increase in wholesale demand from those discounters and a commensurate decrease in demand from other dealers offering greater retail service.
- 1.4 The table below shows the significant growth in wholesale demand for Festool products by the three most active discounters over the last three years. However, the total sales of Festool products over that time has remained at the same level. These figures show that the aggressive price strategy does not increase the overall sales of Festool products but redistributes sales from the non-discounting dealers to the discounters who tend to provide reduced service.

2. To what degree has Tooltechnic observed products being sold with insufficient retail service? Is this consistent across the entire Tooltechnic product range?

Pre-sales service

- 2.1 Our client recently conducted a survey of dealers who were asked whether Festool products require more extensive sales techniques (eg. product information and demonstrations) than other products they sold. Of the 25 respondents, 100% said yes and they made the following comments:
 - (a) 'Due to the superior features on most Festool tools there is a need for salespeople to help customers understand what these are and how they benefit the end user, which in turn should command a premium price' –
 - (b) 'Festool tools are generally far more complex than other tools within the same category. To properly demonstrate the unique features of the Festool range, it does require more time and explanation' and a same category.

2.10 Through our client's customer complaints process, Holger has observed a general increase in the number of customer issues caused by dealers having insufficient product knowledge and training or by dealers providing insufficient post-sales service. For example, customers using the wrong abrasives for a particular application. He considers that the low margins on Festool products due to discounting is placing pressure on dealers to minimise costs associated with selling Festool products which has contributed to reduced service levels. Please see Annexure C for Holger Schulz's witness statement.

	Post-sales service and warranty claims
2.11	Darren Stewart, NSW Technical Sales Consultant at Tooltechnic, has recently received complaints from . These dealers have had customers attend their stores who have purchased tools online and have been refused any service from the online dealer when they experience issues with the tool. These dealers then incur costs in the time and resources required to handle the customer's complaint without having made any profit on the sale of the tool.
2.12	The customer at bought a Festool product from online on the basis of the lower price. The product broke down within a week and the customer was advised by to take the product into to make a warranty claim.
2.13	The customer who attended had bought a sander online from When he had a technical problem with the product he was advised to contact a local dealer. The customer in question was Please see Annexure C for Darren Stewart's witness statement in relation to this, and other comments referred to in this letter.
2.14	Daniel Korman, NSW Technical Sales Consultant at Tooltechnic, had a similar experience with a customer,
2.15	In an email to our client, comments that 'many Festool customers that have been lured to other discounting dealers only to be sold the wrong product and given poor advice and no service or backup. In fact they are told to contact Festool or the rep as its not their problem even to the point some customers have been abused verbally'. Examples of customers who have had this experience are least please see Annexure B for full email.
2.16	also comments that it is very common for customers who purchase Festool products at another retailer to attend his store because the retailer does not handle service work or is located too far away. estimates that providing returns service takes an average of 25 minutes (organising packaging, actual

packing and booking the pick up with Star Track). One example was a customer who

	•	ded store because he had a problem with his six month old Kapex Saw that he hased from . The customer said he was told by that the mer had to arrange for the tool to be returned directly to Tooltechnic.
2.17	twice	recalls one example where a customer contacted mistakenly thinking they were Festool Australia. The customer was who was looking to resolve issues he was having with a He mentioned that he made a warranty claim with and called them to check on its progress. Please see Annexure B for full email and document provided to our full email and document provided to our
2.18	suffice required purch required and the	client has also seen an increase in customers complaining that dealers do not hold be seen to expect the tools. A recent complaint was received from who hased the XI domino mortiser and was unable to find sufficient stock of dominos ared to operate the tool. In the dominos did not have supplies the customer had to wait for the dominos to be couriered from another store. Please the supplier of the full email.
	Cons	istency across products
2.19	Our c	lient cannot identify any particular products as being more susceptible to poor retail see and considers that this issue is consistent across the range of Festool products.
Infor	mation	relating to the likely future with and without the proposed conduct
3.	Toolt under occur	echnic's supporting submission refers to a number of dealers who focus on recutting other dealers. Please provide examples of instances where this has red.
3.1	under In ord	response to question 1, we have outlined the dealers who are the most focussed on cutting other dealers. The discounting dealers are focused on growth and volume. ler to achieve these goals their strategy is to offer the lowest prices to gain market from other dealers.
3.2	Consi	Orchard (National Sales Manager at Tooltechnic), Jaco du Toit (Technical Sales ultant at Tooltechnic) and Wayne Dunn (Queensland Technical Sales Consultant at echnic) describes some of the undercutting strategies below.
	(a)	strategy is to be the cheapest and will drop below any other advertised price. has told Noel Orchard that he will advertise the new tools at list price, however, as soon as he sees a cheaper price, he will drop his internet pricing.
	(b)	strategy is not only to match prices but to actively offer cheaper prices to win business. Their advertisements offer the 'best deals and best prices'.
	(c)	latest catalogue stated on the front cover that they will beat any price by 11%. There was a comment made on a forum that explained to purchasers that if they look at website and convey these prices to will beat the price by a further

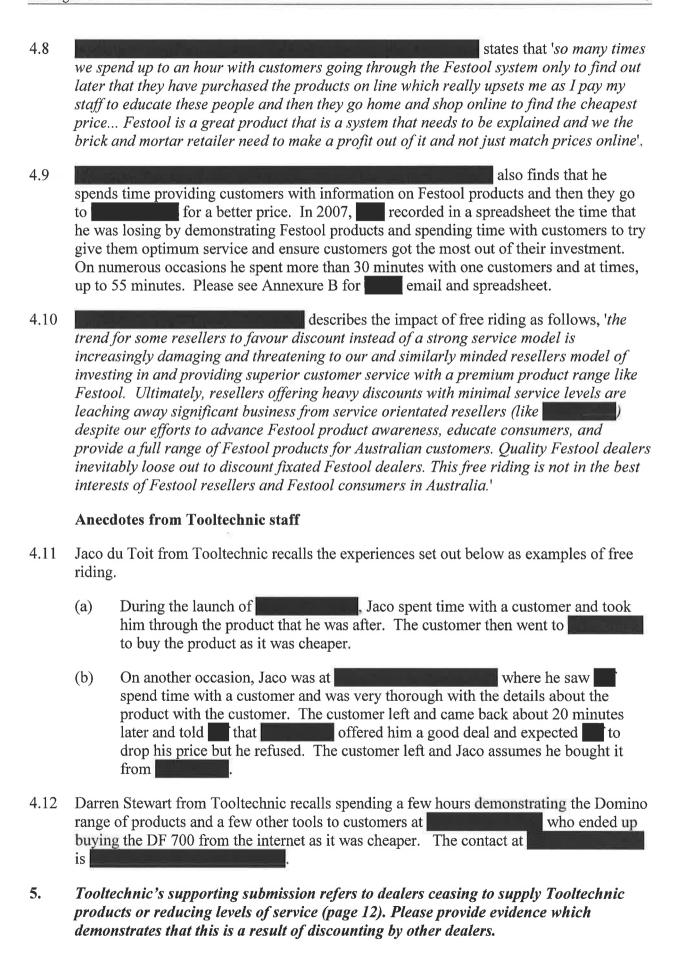

- (d) have decreased their retail presence and are focusing more on cheap online sales.
- (e) are known to match pricing immediately once they are made aware of another dealer's prices.
- 3.3 Please see Annexure C for witness statements of Noel Orchard, Jaco Du Toit and Wayne Dunn in relation to the above comments and others referred to in this letter.
- As discussed in question 1, the most harmful aspect of these undercutting strategies is that they are continuous.

 describes the situation as follows, 'I don't begrudge anyone having an annual sale or special event with associated pricing, but normalised deep discounts are problematic across our industry and Festool has been swept up in this to the point where it is not profitable to sell when you consider the man hours, training & stock holding required.
- 3.5 Wayne Dunn describes the current discounting situation as follows, 'When these larger dealers start listing products on their website at a heavily reduced discount price it starts a domino effect across the market'.
- 4. Tooltechnic's supporting submission refers to a 'high risk' of free riding under the current distribution model. Please provide evidence where this has occurred in practice.
- 4.1 We have set out below a number of examples of the free riding that is currently occurring under the existing distribution model.

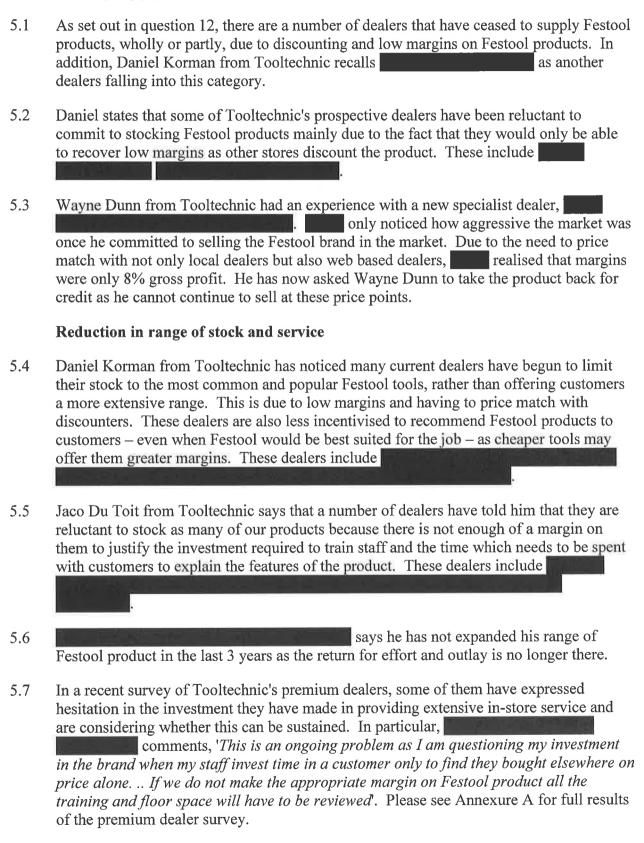

Dealer survey

- 4.2 Our client recently conducted a survey of its Festool Partner Dealers. Of 25 respondents:
 - (a) 100% agreed that Festool products require more extensive sales techniques (eg. product information and demonstrations) than other products that they sell;
 - (b) 91% agreed that staff require more extensive training regarding the features and benefits of Festool products than is required for other brands;
 - 96% said that they are aware of instances of customers receiving detailed Festool product advice in their store only to source the product online or from another dealer who offers a cheaper price with less service. A few dealers such as commented that this happens on a regular basis; and
 - (d) 100% said that they concerned that their margins are diminishing due to 'no frills' or 'less service' dealers offering lower prices without the sales services they provide to their customers.
- 4.3 Some comments made by dealers in the surveys are:
 - (a) 'We are currently dealing with a dust extractor warranty repair that was bought at another store after we gave advice to customer. This customer did not contemplate going to the place of purchase but came here because he knew of our

		knowledge of repairs. WE HAVE BEEN USED AND ABUSED AGAIN! - ;
	(b)	'We have spent innumerable hours with customers who have already bought online "because it was cheaper" but who did not receive adequate product knowledge/training. We have also spent countless hours explaining Festool tools to prospects only to be confronted with a web browser on a smart phone and the challenge "but I can get it for that price at x".' - and
	(c)	'This is an ongoing problem as I am questioning my investment in the brand when my staff invest time in a customer only to find they bought elsewhere on price alone' -
	Feed	back received directly from dealers
4.4	inves 'real to the last 2 They dedic provi	has also expressed ration at being regularly undercut by discounting dealers despite the extensive atment made in providing retail services at his store. He says that this is having a adverse consequences for my business. Half of my business is exclusively dedicated a promotion and sales of Festool products. My business has been built up over the 20 years. We offer the complete range of services available to the potential buyer, include such things as: Stock of complete range of product. Half of our showroom exted to Festool display. Instore Demonstration centre. All after sales services ided (shipping tools for repair). On road demonstrations and deliveries by our lling Sales Representative. All of the above comes with a real and significant cost to funning of my business and the below Instances [of discounting and free riding] which the ecoming more frequent make this hard for me to sustain the business as it exists
4.5	at his said	recalls spending half an hour physically demonstrating a circular saw to a customer in-shop Test Centre who then purchased the saw from were \$80.00 cheaper than you and they threw in some sanding discs'. We see Annexure B for witness statement.
4.6	exten deale price	comments that he has had customers that use them as an information source only. Customers receive an asive demonstration and advice and then either ask to price match another or or just do not commit. knows that these customers purchase elsewhere on as they come back to his store to purchase accessories for the tools demonstrated to . One customer that is a common 'free rider' is
4.7	as he count only	has told our client by email of stance where a customer purchased Festool products from him and when the mer discovered the product cheaper at another dealer, he unleashed a tirade of abuse stated that had ripped him off. says, 'the frustration here was the eless store demos, on site demos, delivering items to site as a premium service to him to have him jump ship when it came to someone else's bastardisation of pricing's customer was . Please Annexure B for full email.

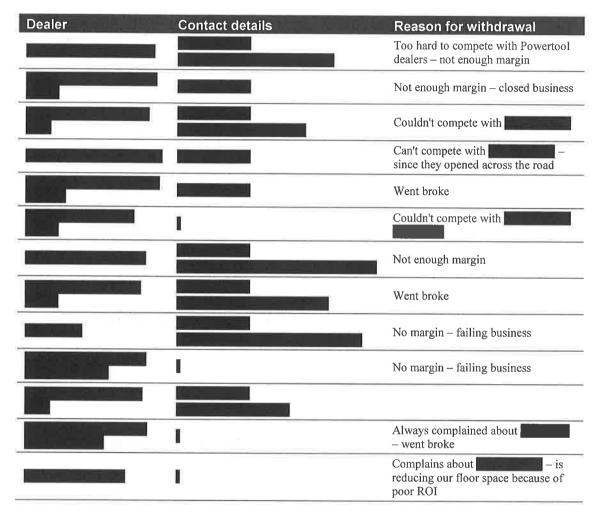

Ceasing supply

- 6. Why has discounting of Festool products persisted against Tooltechnic's wishes? What attempts has Tooltechnic made to stop discounting? Why have they failed?
- Our client is acutely aware of the strict nature of the prohibitions against resale price maintenance and does not have a strategy in place to directly stop discounting. Rather it has engaged in a selective distribution policy that requests dealers to meet certain criteria in order to obtain discounts. Compared to other competitors, Tooltechnic does not supply to hardware chains or sell products through auction sites such as ebay.
- 6.2 Details of Tooltechnic's distribution arrangements are set out in its application for authorisation. We note that the three-tiered distribution arrangement described in the application (Premium Shops, Partner Dealers and Specialist Dealers) has been in place for the last 8 years. Originally, the Premium Shops were known as 'Festool Shops' and were less refined than the Premium Shops. Although the details of the dealer agreements have changed over the years, the underlying structure has not and the dealer arrangement has been implemented in a consistent way.
- 7. Please explain why Tooltechnic continues to supply the "minority of dealers who "under invest' or do not invest in the supply of retail services necessary to support the sale of Tooltechnic products" (as set out at page 12 of the supporting submission).
- 7.1 Our client is aware of the risk of breaching competition laws if it decided not to supply certain dealers on the basis of their discounting behaviour and has not implemented such a strategy.
- 7.2 Tooltechnic encourages dealers to invest in retail services by offering favourable trading terms, discounts and rebates depending on the level of service they provide. However, it is still possible for dealers to meet performance criteria that can be objectively measured by Tooltechnic but nevertheless offer insufficient retail services to customers.

8. Please provide contact details (name, telephone number and email address) for the ten most recent dealers that have ceased stocking Festool products.

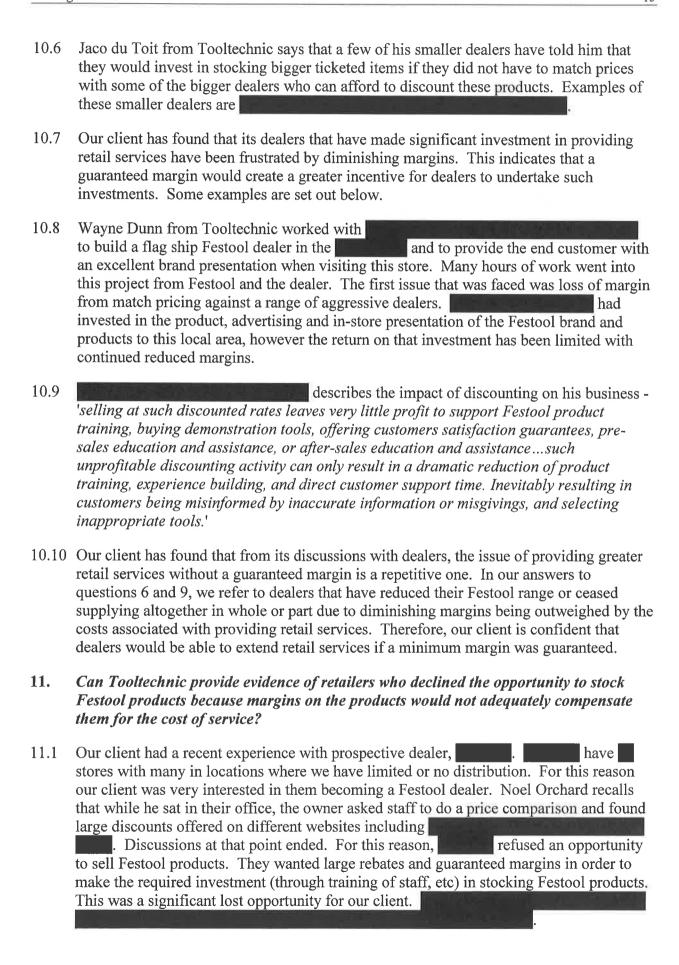

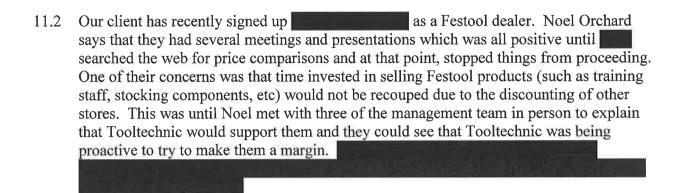

- 9. Please provide (in excel spreadsheet format):
 - (a) Tooltechnic's current \$AUD Recommended Retail Prices for its products; and
 - (b) Tooltechnic's proposed \$AUD Minimum Retail Prices for its products.
- 9.1 We have set out in Annexure B our client's recommended retail prices for 2014, proposed minimum sale prices if authorisation is granted and proposed recommended retail prices if authorisation is not granted.
- 9.2 The proposed prices are based on the assumption that there is no price increase from Tooltechnic's supplier and that there is no significant change in the AUD/EUR exchange rate.

- 10. To what degree have dealers communicated to Tooltechnic that they would be willing to provide greater retail services if they did not have to match discounters?
- 10.1 In Tooltechnic's recent dealer survey, dealers clearly indicated that they are concerned about their margins on Festool products and would be willing to provide greater retail services if they did not have to match discounters. We have highlighted the most relevant aspects of the survey results.
- 10.2 In relation to margins on Festool products:
 - (a) of the 25 respondents, 76% stated that they were concerned about the margins on Festool products; and
 - (b) of the 76%, 100% stated that they were concerned that their margins are diminishing due to 'no frills' or 'less service' dealers offering lower prices without the sales services that they provide customers.
- 10.3 Some of the comments were:

(a)	'our profit margins are down to about	on invoice costs due to having t	0
	compete with online sales' -		ı;

- (b) 'Festool power tools now earn us the lowest GP [gross profit] of any brand in our store, predominantly due to price matching on line "every day discounters". ' grand and grand and grand grand
- (c) 'Margins on Festool products have dropped considerably, as online stores have become more prevalent' -
- 10.4 In relation to whether dealers would provide greater retail services if they did not have to match, the survey results found that of 25 respondents:
 - (a) 92% agreed that if margins on Festool products were guaranteed at an acceptable level (i.e. because prices for Festool products for all dealers were uniform), they would consider extending their Festool product selection; and
 - (b) 87% agreed that they would be interested in becoming a dealer with some sort of Festool Shop-in-Shop concept, if margins on Festool products were guaranteed (ie because prices for Festool products for all dealers were uniform).
- 10.5 Some of the comments were:
 - (a) 'We would look more favourably on keeping greater stock levels of existing Festool tool range if margin were guaranteed at an acceptable level say Quite frankly we would also try harder to sell the range as we would know we weren't wasting our effort for some other discount dealers benefit' -
 - (b) 'I believe this would give us quite an advantage in increasing sales, as we would then be able to rely more on our own level of service, rather than how cheap we can cut the price' -

Information relating to upstream market dynamics

- 12. Is Tooltechnic aware of other premium hardware manufacturers/distributors entering the Australian market in the past five years? Please specify which product segments (as outlined at pages 10 11 of Tooltechnic's supporting submission) this relates to.
- 12.1 No.
- 13. Is Tooltechnic aware of other premium hardware manufacturers/distributors exiting the Australian market in the past five years? Please specify which product segments this relates to.
- 13.1 No.
- 14. Is Tooltechnic aware of any parallel imports of Festool products? Please specify which product segments this relates to?
- 14.1 No. Although our client is aware that some end users purchase Festool products directly from Europe and accessories and consumables from the United States.

Information to clarify Tooltechnic's submission

- 15. Tooltechnic's supporting submission sets out estimates of market shares at Figure 6. Please provide the basis for these estimates. Please specify whether these estimates include DIY end users.
- 15.1 Our client estimated the market shares at Figure 6 of Tooltechnic's submission by using a combination of publicly available data (eg. Makita revenues) and market intelligence gathered from industry sources such as its dealers, competitors and market researchers.
- 15.2 The market share estimates include DIY end users, although they constitute a small proportion of the market.
- 16. For the past three financial years please provide:
 - (a) sales data disaggregated by dealer type;
 - (b) sales data disaggregated by product segment; and

- (c) the percentage of sales that are system components, accessories and consumables.
- 16.2 Please see Annexure E.
- 17. For each product segment (as outlined at pages 10 11 of Tooltechnic's supporting submission) please indicate:
 - (a) whether the system components, accessories and consumables in relation to each category are proprietary;
 - (b) whether there are third party manufacturers of the system components, accessories and consumables for these products; and
 - (c) Tooltechnic's estimates of its market share for the system components, accessories and consumables for each product segment.

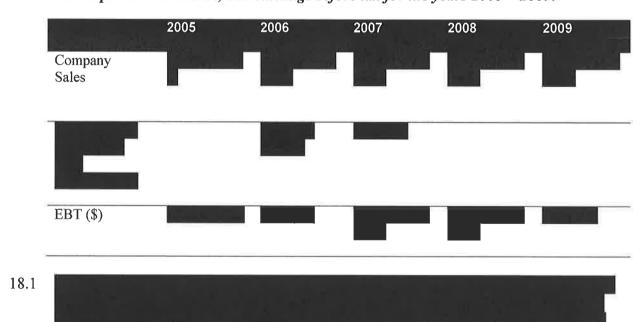

Proprietary or third party suppliers

- 17.2 You have asked us to indicate whether the system components, accessories and consumables in each product segment are proprietary. However, some consumables in the same product segment will be proprietary and others will not. Instead, we have considered whether each individual consumable is proprietary or whether there are third party suppliers of that consumable.
- 17.3 Please see Annexure F for the table of consumables which indicates whether the consumable is proprietary or whether there are third party suppliers of that consumable. If a consumable is marked as being in neither category then the consumable could potentially be produced by a third party but there are no current substitutes. Please note that we consider 'proprietary' to mean a consumable, which only Tooltechnic has the right to produce and a substitute cannot be produced by a third party.

Market shares

- 17.4 Unfortunately our client does not have access to sufficient market information to be able to provide market shares figures for consumables in each product segment. We have set out below estimated market shares for particular groups of consumables in the proprietary category and also in the third party suppliers category to give you an indication of our client's positioning in the consumables market.
- 17.5 The main group of consumables that fall within the proprietary category are the Domino Dowels. The Domino Joining System is unique to Festool. The Domino Power Tools are currently covered by patents and so is the specific design of the Domino Dowels. There are however aftermarket dowels for the Domino that are already available on the market that bypass the patents. However, they are not widely accessible. Customers who have purchased a Domino machine tend to prefer to buy the original consumable. For this consumables group, we estimate the market share could be around in Australia.
- 17.6 However it must be noted, that there are substitutes for the Domino machine such as a traditional biscuit joiner or round dowels. The Festool Domino gives a superior result and is faster.

- 17.7 Another example of a group of consumables where Tooltechnic has a significant market share would be the guide rail system for the track saws TSR 55 and 75. Until about 7 years ago, Tooltechnic held patents on the saw and the guide rail system. Today, several companies offer copies of the Festool guide rail including the market leader Makita (http://www.home-product-reviews.com/Makita-Guide-Rail), Dewalt and the Total Tools Group (Scheppach). We would estimate that the market share for guide rails for circular saws would be between
- 17.8 There are a number of other components in the Festool range, where specific designs require specific consumables, but they do not play any significant role in the overall turnover of Tooltechnic.
- 17.9 The majority share of consumables sold consist of dust bags, abrasives, sanding pads saw blades and to a lesser extend, jig saw blades. There are countless specialist suppliers that offer these products to dealers and customers. Tooltechnic's market share for this category of consumables would be between (eg. router cutters) and a maximum of (eg. dust bags for vacuum cleaners and dust extractors).
- 18. Please provide total sales, and earnings before tax for the years 2005 2009.

If you require any further information in respect of this matter, please contact Geoff Carter on 03 8608 2090.

Yours faithfully

1	Absolutely, we may not have the prettiest nor best presented store but we have always ensured we provide a high quality of customer service, especially on complex or premium products such as Fein, Tormek & Festool. Large chain stores/groups that are all given dealerships because they trade under one banner have contributed heavily to this in SOME cases. Dealerships should be granted on their merits, not on which buying group or franchise you're in. Companies such as Stihl, Husqvama etc have learnt this.	7/9/2014 8:33 PM
2	I could name many of them, they are only price driven, no service, warranties are also an issue.	7/9/2014 1:13 PM

Q6 In making stock and product selections for your store, do you consider the sales training and product knowledge which is required to sell certain products? (i.e. the more time consuming a product is to sell, the less attractive it is to stock)

Holger Schulz RE: ACCC Enquiry

Good Morning Holger,

I don't have any written proof on what has been happening in the last 6 to 7 years but can remember a lot of conversations with customers regarding them buying tools on line and not knowing what they are really getting or how to use the tool correctly.

I can also tell you that so many times we spend up to an hour with customers going through the Festool system only to find out later that they have purchased the products on line which really upsets me as I pay my staff to educate these people and then they go home and shop online to find the cheapest price.

The main offenders online that I have found is

I haven't expanded my range in the last 3 years as the return for effort and outlay is not there anymore.

Hope this will help as Festool is a great product that is a system that needs to be explained and we the brick and nortar retailer need to make a profit out of it and not just match prices online.

Kind Regards,

From: noreply@salesforce.com [mailto:noreply@salesforce.com] On Behalf Of Holger Schulz

Subject: ACCC Enquiry

ear

As you are aware, the ACCC is currently investigating if they shall accept our submission for exemption from the prohibition of Resale Price Maintenance.

They are in particular interested to be provided with specific evidence of the following:

a) Where products have been sold by dealers with insufficient retail service.

For example a customer was sold the wrong product for the job, not made aware of the correct usage, no made aware of all the features etc.

In this case he may have come to you and complained about this other dealer.

Would you be able to provide us with deals of such situations and if possible contact details of this customer?

b) Where you have lost a sale for Festool product to a dealer who was only offering a lower price but not all the services you would have been able to offer

Would you be able to provide us with deals of such situations and if possible contact details of this customer?

c) Examples of dealers who focus on undercutting other dealers when it comes to selling Festool Which dealers would come to mind?

We would very much appreciate your feed back as the more specific we can be the better are our chances of success.

The information you provide will not go into the public domain.

We require your fed back by Sunday evening, 10th August

Thank you very much for your support

Best regards,

Holger Schulz

From: Friday 8 August 2014 08:14 am Sent: Holger Schulz To: Re: ACCC Enquiry Subject: Hi Holger I have made submissions to the ACCC myself and hope all goes well. In relation to your request we have many customers that use us as an information source only to either be told can you match another dealers price or just do not commit after getting extensive demonstration and advise but we know that they purchase elsewhere on price as they come back and purchase accessories from us for the tools demonstrated to them. As most of these type of customers are not regulars we would not have their information but here is one time wasters. he other request is a bit easier as we have many Festool customers that have been lured to other discounting dealers only to be sold the wrong product and given poor advice and no service or backup. Infact they are told to contact Festool or the rep as its not their problem even to the point some customers have been abused verbally. I relation to the offending dealers I do not feel there is any one I could point the finger at as we are all guilty of cutting prices from time to time to get the sale. The dealer that we have the most complaints about in relation to poor or incorrect advice is contrast we do not have to many price related issues with them. The most price related problems are two fold firstly over the phone and three dealers come to mind The second type of price problem is in store where a customer has gone into another store and got a quote the two worst offenders here are Good luck

Regards,

A new Web-to-Case record has been created. Details are:

Date/ time created: 12/08/2014

Customer Email address:

Customer name:

Customer query/ comment: 2 weeks ago i purchased the XI domino mortiser. The Machine is great. It rips into Australian hardwoods easily and am very pleased with it. The only issue I have is I can't get enough dominos. I have a big Outdoor furniture contract at the moment and have spent a lot of the time running around trying to buy 10mm exterior dominos. I have cleaned out the supply out in the past week. Having them courier from other stores to my nearest store. The guys at couldn't help and didn't seem to concerned, much the same. It seems most dealers only stock one or 2 of the 85x10mmx50mm packs. Pretty annoying considering I have spent over \$2000 on a machine that I can't get enough dominos to keep me going. Why is there such a small supply? I understand they're reasonably new but there are barely enough in all of western sydney to just keep me going. Can I buy in bulk directly from Festool? Alternatively I will set up a jig and make my own. Cheaper in the long run but I am time poor and would prefer to just buy. Thanks for your time.

Hi Holger, please see some examples which spring to mind below:

I have provided a couple of instances which I can recall quite vividly (still)!

Not certain how they would feel about being contacted by anyone in relation to their privacy, but you have the info below to follow up on my behalf if needs be.

Kind regards,

Subject: ACCC Enquiry

Dear

As you are aware, the ACCC is currently investigating if they shall accept our submission for exemption from the prohibition of Resale Price Maintenance.

They are in particular interested to be provided with specific evidence of the following::

a) Where products have been sold by dealers with insufficient retail service. The spring to mind daily here, however, they are not selling TTS product (yet), But are a clear example of how we differ in our approach to sales & selling.

The internet store we mostly have thrown at us for cheaper pricing (on all brands of product is most definitely In relation to TTS product this problem seems to have ceased online. (I believe it still continues via direct communication with their sales staff)!

As far as specific incidents, none spring to mind with Festool products, however there are lots of examples from where there is no service!

In general, I have found plenty of Festool/Protool owners who have purchased from other dealers over the years & came here for consumables/acc's/service/new tool purchases & have NOT been unhappy with the other dealers. This, I believe is a reflection on the quality training provided to reputable TTS dealers.

For example a customer was sold the wrong product for the job, not made aware of the correct usage, no made aware of all the features etc.

In this case he may have come to you and complained about this other dealer.

Would you be able to provide us with deals of such situations and if possible contact details of this customer?

b) Where you have lost a sale for Festool product to a dealer who was only offering a lower price but not all the
services you would have been able to offer
A customer has played me off against website prices (not recently) to obtain the price he was happy to pay but only after I gave him all the relevant info & details he required to make his decision.
He told me later that he purchased from them due to cheaper price (I quoted list price + freight at cost to him in his town of which I service from (I quoted list price + freight at cost to him in his town of (I quoted list price).
Same customer played me off against the same store website after the above incident but purchased from me only due to matching their price to get the sale (I found out after he obtained price he was happy with, I only got the sale
because I could get it to him the next day & they would have taken 2-3days) This customer told me he spoke to them & obtained a deal over the phone (via price from their website), but they couldn't supply overnight to him from Sydney.
Would you be able to provide us with deals of such situations and if possible contact details of this customer?

c) Examples of dealers who focus on undercutting other dealers when it comes to selling Festool

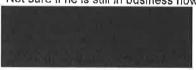

Which dealers would come to mind?

This customer (who appears to no longer be my customer!) purchased products from us (TS55 & acc's) & had ordered (which was awaiting him to collect) an RGP150 but couldn't collect as he was away working in Melb. Upon making contact he then proceeded to unleash a tirade of abuse on us as he stated we had ripped him off! When asked how he came to his conclusion, he stated that he went to sthem asked how he came to his conclusion, he stated that he went to sthem asked in excess of \$400 on same product as what he purchased from us.

I then spoke with the TTS rep at the time to find out the story was correct as dealer had a sale event which attracted bonus items also combined with ridiculous pricing which simply added to my customers frustration.

We then had to make good on his next purchase if we were to win him back (when we had done nothing wrong). In the wash up, he did still purchase the RGP150 but it cost us in more ways than one to win him back, The frustration here was the countless store demos, on site demos, delivering items to site as a premium service to him only to have him jump ship when it came to someone else's bastardisation of pricing.

Not sure if he is still in business now as we don't see him at all nor hear anything from him.

We would very much appreciate your feed back as the more specific we can be the better are our chances of success.

The information you provide will not go into the public domain.

We require your fed back by Sunday evening , 10th August

Thank you very much for your support

Best regards,

Holger Schulz

Stat	ement of the second sec
I.	l, Manager, say as follows:
	(a) I am the Owner and Manager of I am authorised to make this statement on behalf of
	(b) I make this statement from my own knowledge or from having consulted relevant staff and dealers of
Job tit	tle and position
2.	
3.	As owner / manager, I am responsible for all day to day business operations. This includes Sales / marketing.
My ex	perience
4.	I would like to provide details about two incidents which occurred within the past 2 months. These type of incidents occur regularly. These are incredibly frustrating for me and have real adverse consequences for my business. Half of my business is exclusively dedicated to the promotion and sales of Festool products. Half of our showroom is dedicated to the display of Festool products. My business has been built up over the last 20 years. We offer the complete stock of Festool products and a range of associated services to the potential buyer. They include such things as:
	(a) an in-store demonstration centre;
	(b) after sales services (eg. shipping tools for repair); and
	(c) on road demonstrations and deliveries by our travelling Sales Representative.
5.	All of the above comes with a real and significant cost to the running of my business and instances like those set out below, which are becoming more frequent, make it hard for me to sustain the business as it exists now.
	Incident 1
6.	A regular customer came into the store recently who I had been talking to about a RO90 sander the week before. He started asking questions which made it clear to me that he must have purchased the machine but needed guidance on all the different operations (eg. changing pads, difference in settings, etc.). After asking him about the tool, he informed me that he had actually purchased from
7,	They had given no guidance to him on the benefits/features on the tool. We had provided all of that to this customer the week before. had won this sale purely on price.

8. In this example, I estimate we had spent ½ hour physically demonstrating this product to this customer at our in-shop Test Centre, only for him to go and purchase elsewhere because of price.

Incident 2

- 9. A customer came into my shop with KS120 Kapex Drop Saw. This customer is familiar to me as he comes in and buys bits and pieces every so often (confirmed by our sales history for him). He has a problem with his six month old Kapex Saw that requires shipping back to Tooltechnic for a Warranty repair. When I have looked up his sales history to find the purchase date, I find that in fact he hasn't purchased this saw from us. He then tells me that he purchased the saw from I asked if he had considered purchasing from us. His response was that, yes he did come in at the time to enquire about the features and benefits of the saw. We provided him with a price at the end of our demonstration. However, he said that in the end he couldn't go past the price that offered (apparently \$140.00 cheaper than us). This sale required no more effort than providing a drastically discounted price.
- 10. The customer, while a little embarrassed to be bringing the saw into us to sort out the Warranty, was told by that the saw would have to go back to Tooltechnic and they suggested that he phone Tooltechnic to organise its return. He was very annoyed about having to repack for shipping as he did not have the original packaging. Tooltechnic then suggested he come into us because this is a service we provide.
- 11. This is in fact only a service we provide for our customers that have purchased tools from us. This is because, it takes us on average 25 minutes to organise packaging, perform the actual packing, booking the pick up with Star Track etc.
- 12. This type of instance is very common. Reasons customers give us for not returning back to the retailer where they made the original purchase include:
 - (a) that the retailer doesn't handle service work; and
 - (b) the retailer was too far away to make it easy for them to return to the original retailer.

Statement of Holger Schulz

- 1. I, Holger Schulz, of Managing Partner, say as follows:
 - (a) I am the Managing Partner of Tooltechnic Systems (AUST) Pty Ltd (Tooltechnic). I am authorised to make this statement on behalf of Tooltechnic.
 - (b) I make this statement from my own knowledge and from having consulted relevant staff and the records of Tooltechnic.

Job title and position

- I commenced working at Tooltechnic in 2000 I have held the role of Managing Partner for the past 4.5 years.
- 3. As Managing Partner, I am responsible for Operations, including Customer Service, Finance, Logistics and After Sales

My experience

- Through Tooltechnic's complaints process, I have observed an increase in the number of customer issues caused by dealers having insufficient product knowledge and training or by dealers providing insufficient post-sales service. This increase in customer complaints has occurred since my return to Tooltechnic in 2010, which correlates with the increase in the discounting behaviour of some dealers. Some recent examples are customers using the wrong abrasives for a particular application and customers complaining that they cannot purchase consumables and accessories from the dealer from whom they purchased the tool. Frequently we have customers complaining to our team that dealers do not hold sufficient stock, in particular when it comes to accessories and consumables which are required to operate the tools.
- 5. I have observed an increase in online sales to purchasers who do not reside in the same State or Territory as the dealer. We have been able to notice this trend through the warranty registration process where customers provide us with their residential address and details of the dealer from whom the tool was purchased. With these types of online sales, a dealer cannot provide any pre-sales services such as demonstrations or any face-to-face service if a customer has any difficulties with a product post-sale.
- I have seen a decline in the participation of some dealers in sales campaigns and attendances at trainings. One example is who has not attended training, stating repeatedly that they cannot afford to send staff to training. I think that the low margins on Festool products due to discounting is placing pressure on dealers to minimise costs associated with selling Festool products which has contributed to reduced service levels.

Statement of Daniel Korman

1.		miel Korman, of NSW Technical Sales sultant, say as follows:
	(a)	I am a NSW Technical Sales Consultant of Tooltechnic Systems (AUST) Pty Ltd (Tooltechnic). I am authorised to make this statement on behalf of Tooltechnic.
	(b)	I make this statement from my own knowledge or from having consulted relevant staff and dealers of Tooltechnic.
	(c)	The experiences set out in this statement occurred within the past year.
Job	title an	d position
2.		nmenced working at Tooltechnic in August 2013. I have held the role of NSW nical Sales Consultant for the past year.
3.	sales,	SW Technical Sales Consultant, I am responsible for account management, dealer customer service, end user demonstrations and solutions, and dealer display ntation.
My (experie	nce
4.	The f	ollowing dealers discount our product:
	(a)	- claim on their website they will beat any advertised price by
	(b)	- ran a storewide off sale that lasted for 6 weeks and included Festool
5,	level lose l	bought his first Festool tool (Domino) after reching it. He reluctantly bought it from as the price was the cheapest. knew that if he was to have an issue with the product he would not be able to get the of service he would have liked from as he feared they would possibly his machine or be left without a machine for a long duration of time. Sure enough ended up being an issue with the tool and he therefore came to me to try to sort out varranty claim more quickly and securely.
6.	Two	of our dealers have ceased acting as Festool dealers, at least in part due to unting of Festool products by competitors. These are:
	(a)	and
	(b)	
7.	prod	e of our prospective dealers have been reluctant to commit to stocking Festool ucts mainly due to the fact that they would only be able to recover low margins as s discount the product. These include:
	(a)	; and
	(b)	
8.	Due limit	to low margins and having to price match, many of our current dealers have begun to their stock to our most common and popular tools, rather than offering customers a

more extensive range. These dealers also lose motivation to recommend our products to customers – even when Festool would be best for the job – as cheaper tools may offer them greater margins. These dealers include:

Daniel Korman

Statement of Noel Orchard

- 1. I, Noel Orchard, of as follows:
 - (a) I am the National Sales Manager of Tooltechnic Systems (AUST) Pty Ltd (Tooltechnic). I am authorised to make this statement on behalf of Tooltechnic.
 - (b) I make this statement from my own knowledge or from having consulted relevant staff and dealers of Tooltechnic.

Job title and position

- 2. I commenced working at Tooltechnic in January 2011. I have held the role of National Sales Manager for the past 3.5 years.
- 3. As National Sales Manager, I am responsible for 9 external field sales staff who are responsible for meeting KPIs, including sales targets, by further developing our current distribution and appointing new dealers to enable our brand to grow.

My experience

4.	The	following dealers discount our product:
	(a)	- feel that they must be the cheapest and will drop below any other advertised price. If the from says that he will advertise the new tools at list price, however, as soon as he sees a cheaper price, he will drop his internet pricing. Only this week, has dropped his advertised price of our new cordless saw (TSC55) by \$110.
	(b)	- concerned about pricing with no confidence in the market to hold price. The new TSC55 is a good example.

- c) last catalogue stated on the front cover that they will beat any price by 11%. There was a comment on a forum explaining to purchasers that if they look at website and convey these prices to will beat the price by a further
- (d) have decreased their retail presence and are focusing more on web sales. This business is always cheap online and advertising on different buying websites with all brands. This has been a big headache for Festool dealers.
- (e) advertised \$1 on cost for a limited time on their Facebook page.
- (f) advertised via brochures and email communications 10% off sale event for everything in store.
- 4.2 We have just signed up as a Festool dealer. We had several meetings and presentations which was all positive until they searched the web for price comparisons and stopped things from proceeding. One of their concerns was that time invested in selling Festool products (such as training staff, stocking components etc) would not be recouped due to the discounting of other stores. This was until I travelled and met with three of the management team to explain that we would support them and they could see us being proactive to try to make them a margin.

- 4.4 have with many in locations where we have limited or no distribution. For this reason we were very interested in them becoming a Festool dealer. However, they wanted large rebates and guaranteed margins in order to make the required investment (through training of staff etc) in stocking Festool products. Whilst I sat in their office, the owner asked staff to do a price comparison and found large discounts offered on different websites. This ended discussions.
- 4.5 contact details are:

4.6 Many of the building suppliers have started reducing brands and not looking at replacing them as margins are too low. One example was who stopped stocking and and not replacing them with other options.

Statement of Jaco du Toit

- 1. I, Jaco du Toit, of say as follows:
 - (a) I am a Technical Sales Consultant at Tooltechnic Systems (AUST) Pty Ltd (Tooltechnic). I am authorised to make this statement on behalf of Tooltechnic.
 - (b) I make this statement from my own knowledge or from having consulted relevant staff and dealers of Tooltechnic.

Job title and position

- 2. I commenced working at Tooltechnic in July, 2012. I have held the role of Technical Sales Consultant for the past 2 years.
- 3. As a Technical Sales Consultant, I am responsible for:
 - Managing and servicing distributors that sell Festool premium products in both Victoria and Tasmania;
 - In-house dealer training on Festool premium products;
 - Merchandising and display of Festool products in dealer stores;
 - End user demonstrations and product advice;
 - Review and recommending product range in all dealer stores;
 - Trade shows/events at both dealer stores and major shows (eg. Working with Wood, AWISA, Total Tools insiders nights); and
 - Monthly sales meetings with dealers.

My experience

4.	I am aware that on more than one occasion, has not only matched prices but has actively tried to do them cheaper to win business. Their adds always say 'best deals and best prices!'.
5.	In March 2013 I was at least launch where I spent time with an end user and we took him through the product that he was after and then he went to buy the product for a cheaper price.
6.	In early 2014 I was at where I saw the owner, spend time with a customer and was very thorough with the details about the product with the customer. The customer left and came back about 20 minutes later and told that did him a good deal and expected to drop his price which he didn't. The customer left and I assume he bought it from
7.	I have had a conversation with directly that he has on more than one occasion beaten a price just to get the business. This would occur where a customer who got their information from another dealer would come in to get a better price from the company.

8. A few of my smaller dealers say that they will invest in bigger ticketed items to stock if they did not have to match prices with some of the bigger dealers who can afford to discount on these products. Examples of these smaller dealers are

9. The following dealers have told me that they are reluctant to stock as many of our products because there is not enough of a margin on them to justify the investment required to train staff and the time which needs to be spent with customers to explain the features of the product. The dealers include, for example:

Jaco du Toit

Statement of Wayne Dunn

- 1. I, Wayne Dunn, of Consultant, say as follows:
 - (a) I am the Qld Technical Sales Consultant of Tooltechnic Systems (AUST) Pty Ltd (Tooltechnic). I am authorised to make this statement on behalf of Tooltechnic.
 - (b) I make this statement from my own knowledge or from having consulted relevant staff and dealers of Tooltechnic.

Job title and position

- 2. I commenced working at Tooltechnic in October 2008 and I have held the role of Qld Technical Sales Consultant for the past 5 years.
- 3. As Qld Technical Sales Consultant, I am responsible for managing the Queensland territory for Festool Australia which involves maintaining a high professional level of service to an established dealer network, building new business prospects and assisting our end user customers with demonstrations and technical support.

My experience

- 4. The opportunity regarding new prospect business is limited in lower populated areas due to web-based dealers being very aggressive in certain hero type products. Hero type products are the top 20% of the Festool tool range. As the top 20% of product in the Festool range return up to 80% of most dealer's turnover this is a major concern. Sometimes just they are only \$20 to \$50 cheaper but this discount is enough to close a sale.
- 5. Larger Festool online/web-based stockist dealers in all areas are under-cutting and playing bully tactics to reduce other competitors gaining a Festool customer base. This is very noticeable in areas such as Sunny Coast Queensland with and clearly noticeable in other larger states like New South Wales and Victoria.
- 6. When these larger dealers start listing products on their website at a heavily reduced discount price it starts a domino effect across the market. are known to match pricing immediately once they are made aware of another dealer acting in this way.
- 7. Internet dealers such as offer free delivery which is clearly also a way of showing a discounted service to any customer around Australia.
- 8. A new specialist account, aggressive the market was once he committed to selling the Festool brand. To match pricing with not only local dealers but also web-based dealers, margins were only . On the 3rd July 2014 I was asked to take the product back for credit as could not continue at these price points.
- web-based dealers due to smaller populated areas. He started off by advising the end user customer that he could not offer his Festool products at such a discounted price due to limited margins. He said that if local customers want local business to keep opening the doors each day, they need to support these dealers. The problem is that the end customer is no longer a life customer and will shop anywhere these days if the price is lower

somewhere else. Currently is matching pricing and once again the domino effect is in play. 10. have provided an up to date website for their business in 2014 and started with suggested retail pricing on all Festool products. After the first three months they noticed very little hits regarding sales on the Festool products. After comparing other web-based Festool dealers, it was clear that pricing was much cheaper on core product lines. have now matched pricing on their website and have started to notice more sales via the shopping cart. Clearly these sales are at a reduced margin so that domino effect keeps rolling on. 11. was a nominated that Festool wanted to work with to build a flag ship Festool dealer to provide the end customer with an excellent brand presentation when visiting this store. Many hours of work went into this project from Festool to build a strong agent. Hours of direct end user calling within this area was completed to build a client data base and a number of in store events were organised such as Festool VIP evening and general store information days. The first issue that we noticed was loss of margin to match pricing around Australia from a range of aggressive dealers. This dealer invested in product and advertising including store front signage to present the Festool brand to the local area however the return on investment is limited with continued price matching as these web base discounters continue to discount and reduced margins for the dealer.
