Categories: Submission

Hello,

I wish to object to the ACCC's decision to re-authorize the MAIF agreement.
A short term agreement is all that is needed until the completion of the review of the National Breast feeding policy
that is due at the end of this year.
Obesity is an alarming problem in our society. The WHO is in the process of
strengthening protections against food
marketing to children and parents, this is due out next year.

Sincerely

Heather Gamble
