Subject: RE: Refrigerant Reclaim Australia application to ACCC- draft determination
[SEC=UNCLASSIFIED]

Dear Mr Jones and Rouw,

We write to acknowledge and congratulate the ACCC on re-authorising Refrigerant Reclaim Australia (RRA) to continue to operate the Australia-wide program to recover and safely dispose of ozone-depleting and synthetic greenhouse gas refrigerants at end-of-life.

The RRA program provides real environment benefit and is an essential element in our industry's efforts to reduce detrimental impacts in the atmosphere. Further, it is a critical enabler of our compliance with Commonwealth legislation.

We are pleased to support RRA's ongoing operations and do not request a pre-determination meeting. We look forward to receiving notification of the ACCC's final positive determination in due course.
