**Subject:** TRIM: RE: A91551 - North East Waste follow-up [DLM=For-Official-Use-Only]

Hello Kathryn,

Thank you for giving me the opportunity to respond to the submissions you have received.

1. Please confirm whether the municipal contracts currently with Cleanaway will not be included in the procurement process for the waste services until they have ceased.

The future procurement NEWRRG is planning to undertake will not affect any of the current contracts. The councils partnering with NEWRRG hold an array of service contracts from previous procurement. Most of these are timed to end at the same time across the region and procurement of services will only affect the contracts that are about to end.

2. Please provide information about this potential conflict, including details of processes or procedures NEWRRG have in place for managing this.

The member of our board in question has sold his company and is not a director of this or any other company that could pose a conflict of interest in tendering for products or services under this authorisation.

I hope that this will satisfy these two points, should there be any question or the need to formalise this response please contact me again.

Thank you

Richard Paschke
