**Subject:** RE: AA1000486 - Medicines Australia and Generic and Biosimilar Medicines Association interim authorisation - Request for information [SEC=OFFICIAL] [ACCC-ACCCANDAER.FID2548316]

Dear Simon,

I hope my email finds you well.

Thank you very much for reaching out in regards to the Interim Authorisation AA1000486. Please find my responses to your questions below:

☑ Is the Proposed Conduct working as expected? I had two initial meetings (for 2 different molecules) so far that included also TGA and the Department of Health and in regards to the conduct everything went according to expectation.

☑ Is the Proposed Conduct taking place as described in the application and the interim authorisation decision? Yes, authorities and companies were sharing information and views in accordance to the proposed conduct.

☑ Are there any particular benefits or detriments that the Proposed Conduct is resulting in? It is important to get insight into the supply and demand situation for the entire country beyond an individual company's situation to identify (potential) gaps and to adjust accordingly. It was therefore very valuable to understand the situation across all market players.

☑ Has your organisation engaged in the Proposed Conduct, and if so, what was your experience in doing so? If not, why not? We have actively engaged in sharing the company's current situation, experiences and potential pain points (in line with the requirements of the conduct) and shared thoughts on moving forward. The feedback and the experience was very good.

The first meetings need to be seen as a start and I see value in continuing with the work group to regularly monitor the situation and to ensure uninterrupted supplies of critical lines.

Please let me know in case you need any further information.

Stay safe...

Kind regards  
Holger
