

**Submission by Amber Hooker-22 August 2025**

I support recycling of soft plastic and research and innovation to decrease soft plastic from The supermarkets. Plus better ways to improve recycling to make this low quality product into something that is wanted by consumers. I do not support a levy that pays supermarkets who already make profits and do not intent to improve the environmental situations caused by plastic an its pollution. I do support a levy being paid to the schemes responsible for the recycling and hope that the ACCC would consider the environmental impact above profit making excercise.
