

CEC Solar Retailer programme

Forces members to pay for extravagant terms and conditions, by challenging existing business terms and conditions with their own legal team "who we cannot afford" tying up resources to such a degree that the member submits and purchases CEC produced T &Cs

Forces members to manually input so called "compliant" wording to invoicing which cannot be computerised by some programmes, adding another unnecessary time impost to businesses

Takes a portion of earnings on top of annual fees

Lobby government departments so they can get control of any renewable rebate schemes offered by the government to their constituents drive this with their their fear policy by means of Safety when in reality they just want a cut and Control of the scheme and be able to force existing members to financially upgrade .

They don't police their own policies , larger more powerful retailers are left to be non compliant .

In SA they forced anyone who wanted to be part of the SA Home Battery Scheme become an accredited Solar Retailer this Netted them Thousands of Dollars

We all have Standards to comply with so we don't need this additional imposition

They will soon come up with another scheme that imposes financially on the small business fraternity to their benefit.
