Dear ACCC

Please register my strong objection to this arrangement.

The profit taking of managed care insurers in the USA has resulted in a layer of funds being unavailable for patient care. I experienced first hand the level of suffering added to disease with the burden of bureaucratic intrusion into whether a patient “qualified” for particular treatments.

The intrusion into the doctor patient relationship and insurance algorithmic approach to what is a spectrum of clinical decision making is counter productive to health.

I hope the ACCC will resist this culture of maximising profit by arbitraging the doctor patient relationship, and encourage efficiency and value for healthcare consumers that does not require an intermediary to interfere in patient care by “managing” it.

Andrew Miller
