Australia

Dear Tess,

The Bureau of Meteorology (the Bureau) appreciates the opportunity to review the Board of Airline Representatives of Australia Inc (BARA) application to the ACCC for a new authorisation AA1000682 related to collective bargaining, and to give effect to arrangements for the acquisition of Essential Aviation Services.

The Bureau is supportive of this submission and regularly consults with BARA on matters relevant to international airlines. The Bureau sees considerable benefit in a locally based representative body for international airlines, who are key customers receiving products and services from the Bureau.

Yours sincerely
