Subject: AA1000542 – Honeysuckle Health – submission

Dear Mr Pappa

I am a practicing anaesthetist in victoria and it concerns me greatly to read of the proposal by honeysuckle health and NIB to bring managed care to australia. The australian public benefit greatly from a world class system with prime access and patient outcomes. There will be little to no benefit to the patient of managed care, I do acknowledge that there is significant financial benefit to the insurers to act in this manner.

We are at a turning point in our healthcare system and managed care in a style similar to USA would be wholly detrimental to the patients, doctors and staff within our networks.

I stand by the Australian Society of Anaesthetists (ASA) initial submission to you voicing multiple concerns with regards to what approval would actually mean, as well as the likely real purpose of the application.

Yours Sincerely

Dr Anna Loughnan
