Subject: Honeysuckle Health/NIB determination

To the ACCC,

As a doctor, I hold grave concerns about the proposed Honeysuckle Health/NIB determination. I believe it will have a sweeping and powerfully restrictive effect on Australia's health and the impact will be seen in morbidity and mortality statistics in the near future. I also believe it to be contrary to the nature of a fair market. I request the ACCC to reject the application.

Regards,

Dr. Asha Nicholson MB BS.
