Subject: AA1000542 – Honeysuckle Health – submission

To whom it may concern:

I am opposed to the Honeysuckle health to form and operate a health buying service.

This managed care model will effectively change our current health standards to one that is driven by money and commercial interest. These are large for-profit organisations that will have too much power and influence in the health sector.

Patients will have diminished choice over what procedure they can have and the choice of which doctors to look after them.

Physicians will not be able to make independent decisions on clinical care without undue burden formed by the health insurance companies and their individual contracts.

We ask that the ACCC to act and protect the independence of the doctor patient relationship and preserve our world class health care system.

Kind regards

Dr Paul Kwei
Medical doctor in Western Australia
