Subject: Honeysuckle Health and NIB

Dear Sir/Madam,

I am a General Practitioner and wish to lodge an objection to the proposed Honeysuckle Health/NIB determination and request that the ACCC reject the application.

This model of managed care and group negotiations has not been demonstrated to be patient centred in jurisdictions where it currently functions, such as the USA. Patient and treatment choices are determined by commercial realities, rather than the current Australian model, that recognises individual choice within a framework that supports best clinical practice.

Yours sincerely
Dr Susan Mathers
