

Submission by Even Investments Pty Ltd-24 November 2024

It is a sad day when a Regional Council cannot give certainty to long standing legitimate business in the community who contribute to the greater good. Unfortunately the Councilors of the Toowoomba Regional Council have not dealt with destabilising influences within and without and as a result Business's who operate on and from the City Airport are left with no option but to incur the expence of time and money to take legal action. It would be good if a higher level of Government would intervene on behalf of all the Employers, Employees, Emergency Services and Business owners who operate their own aircraft that are directly affected to avoid the action that is planned. If that is not possible a united front is the only way to publicly hold the Toowoomba Regional Council to account.
