Subject: AA1000542 – Honeysuckle Health – submission

Dear ACCC

I strongly oppose approval of the Honeysuckle Health 'managed care' proposal.

This endorsement of 'competition' in health care will inevitably decrease quality and choice of care, as has been proven in the US. Assurances to the contrary by the ACCC are driven by a mindset of 'commercial market as an undisputed public good' - not by clinical practice or patient experience. It undermines our world's best practice, mixed public-private health system and will not fix the real problems in health insurance.

The ACCC needs to take a broader, socially literate perspective on it's role - and it's own social license to safeguard public interest, which is imperiled by this approval.
