

Submission by Greg Nicholas-19 August 2025

Retail outlets MUST reduce the amount of soft plastics they are using. It is absurd to find, for example, a few pieces of fruit wrapped in soft plastic, or cos lettuce wrapped in soft plastic. It is totally unnecessary. Even three tubes of toothpaste (already in cardboard) wrapped in soft plastic is ridiculous. I do not want to take that material home to then be immediately discarded. This is the responsibility of the retail outlet/supermarket.
