

Submission by Julia Hopewell-19 August 2025

I am a public consumer; so have no affiliations; so I hope I am eligible to comment. Recycling is in my DNA now :). I want to reduce/eradicate as much as possible. In Tasmania this has been particularly frustrating. I have stockpiled plastic bags ever since the REDCYCLE fell apart. I buy loose vegetables and it is only supermarket meats that I have not yet addressed. Please come up with a central plastics recycling facility on the mainland; so that all of these plastics can be repurposed, as there are many that will never recycle. Thank you.
