**Subject:** AA1000542 – Honeysuckle Health – submission

I am concerned about our Honeysuckle Health proposal because it is a Signa US -style where actuarial stats determine the care of patients rather than what is safe and optimal care for a patient. The latter is best left to the medical doctors/ expert specialists to determine from years of hard studies & clinical experience. Best to leave clinical decisions made with the clinicians not with share-holders. Please do not believe their proposal will improve cost, efficiency and safety. The data is already there in the USA AND IT'S TOO LATE FOR THEM TO REVERSE THE DAMAGES AND RISKS TO PATIENTS. Please listen and not destroy our system. The world including USA is envious with our current system. Let's cultivate it please.
