

Submission by Lily Dunn-21 August 2025

✔ No supermarket payouts – Money should go to recycling & recovery, not supermarket subsidies. ✔
Public funds, public benefit – The levy comes from what we all pay. It must deliver environmental
outcomes, not private gain. ✔ Fairness – Communities are already paying. Supermarkets shouldn't get
special treatment. ✔ Innovation required – Without it, this scheme just repeats old failures. ✔ Fix
governance – SPSA's board is dominated by the same companies creating the problem. Independent
voices must have real power. ✔ Stop the greenwash – Without changes, this looks like PR, not progress.
