Dear ACCC

Council endorses the ACCC decision to grant interim approval to the SPSA and would like to see the collection of funds from manufactures under an eco-modulated model to go ahead.

The eco-modulated model will drive manufacturers to reduce plastic in packaging as well as make recycled content for packaging more desirable.

Council believes there needs to be some oversight and level of control in the roll out of soft plastic collection and processing so one does not go ahead too fast for the other to match it.

What we have found from the soft plastic collection pilot is residents welcome the collection program with over 18% of the shire so far opting in.

Council also would like to see the stewardship program mandatory for all manufacturers of soft plastic packaging.

Yours Sincerely

Bill Pemberton
