

Submission by Maya Panisset-21 August 2025

No supermarket payouts – Money should go to recycling & recovery, not supermarket subsidies. ✓
Public funds, public benefit – The levy comes from what we all pay. It must deliver environmental outcomes, not private gain. ✓
Fairness – Communities are already paying. Supermarkets shouldn't get special treatment. ✓
Innovation required – Without it, this scheme just repeats old failures. ✓
Fix governance – SPSA's board is dominated by the same companies creating the problem. Independent voices must have real power. ✓
Stop the greenwash – Without changes, this looks like PR, not progress.
