Subject: AA1000542 – Honeysuckle Health – submission

I am extremely concerned by the Honeysuckle Health submission to collectively negotiate and manage contracts with health care providers on behalf of private health insurers.

I think this sets in motion an unfair monopoly which will control costings to their advantage but squeezing out all others .

The US has such a system and this removes any chance of doctors having control in their patients care and having to jump through many beaucroatic hoops to even be legible to treat their patients The only winner is the the health care company , everyone else including patients hospitals and health care workers lose Extremely concerned Health Care Worker Sent from my iPhone
