Subject: RE: ACCC consultation - ANZIGA request for interim authorisation [SEC=OFFICIAL]

Dear Steven,

Please see below preliminary views on the proposed conduct.

- NSW Health has developed a forecast of the system’s needs for medical oxygen during the COVID-19 pandemic. NSW Health then engaged with suppliers, who were able to confirm that they are able to produce the required quantities to meet needs for medical oxygen under the worst-case scenario for forecasts.
- As such, there is limited benefit from NSW Health’s perspective from the enable members and other suppliers of medical oxygen to exchange information as per their request.

Kind Regards,

Annemarie Snowdon
