Subject: Managed Care

To whom it may concern,

Please do not allow managed healthcare in Australia.

I am sure you are aware of the slippery slope of managed healthcare and the impact insurers influencing the choices of patients can have on healthcare and the population in general.

If you look at the United States' example, managed healthcare has led to people having tens of thousands, and sometimes even hundred of thousands, in medical bills because they saw a healthcare provider who did not have an agreement with their insurer. How is a patient who is having an emergency able to determine which provider they can get care from if they are unconscious or unable to provide any form of consent?

This is absolutely outrageous. Do not allow this.

Yes Australian Healthcare has issues but this is not the way to fix it.

Managed healthcare will be disastrous for poor people, the working class and the middle class. Healthcare should not only be for the wealthy. Our morality is judged by how we treat the lowly in our communities. Profits should not matter more than people.

Thanks,
Noor Gabrial
